University of Massachusetts
Depository Copy

Dear Dr. Robertson,

Attached is the Charter Application (Parts I and II) for **THE SABIS INTERNATIONAL CHARTER SCHOOL** (known as THE INTERNATIONAL SCHOOL in Minnesota and as THE CHOUEIFAT SCHOOLS in other countries). We are very interested in obtaining charters in Massachusetts for operating more than one public school or in getting one charter with permission to open campuses in various school districts. We could start and operate one school starting September 1994 and up to five **SABIS INTERNATIONAL CHARTER SCHOOLS** by September of 1995. We are excited about having this opportunity to apply for participation in the revitalization of **the** "Education State" in the world.

Over the centuries America's creative and innovative pioneering spirit has accomplished great things and overcome awesome hurdles. Entrepreneurial pride, confidence and self-esteem are other proven sources of energy for American regeneration. If we are allowed to add the substance of our well-tested and confirmed SABIS system to these innate strengths we could model some "light-house" schools in Massachusetts that are very worthy of its heritage and worldwide leadership role in education. We have a vision that this type of education rebirth, especially in a multicultural setting, has an enormous power to change the future of many individuals, the state and eventually the entire country.

Throughout the areas where our 10 schools currently operate, we are known among students, parents and education professionals for our outstanding track record in preparing average kids for top-notch colleges all over the world based on:

- * high and well formalized expectations for academic excellence
- * a clear, balanced and challenging curriculum (including a strong emphasis on world-language and high math achievements)

THE SABIS INTERNATIONAL CHARTER SCHOOL

CHARTER SCHOOL APPLICATION: PART I

1.) MISSION STATEMENT

Describe the core philosophy or underlying purpose of the proposed school.

The Sabis International Charter School is a college preparatory school that will provide top-quality education to disadvantaged children in needy neighborhoods. It will teach children to perform to the best of their ability and to achieve academic excellence in a global context. Graduates will be prepared to attend colleges and universities. The school develops and strengthens students' ethical, moral and civic values thus molding men and women with the knowledge, skills and social judgment to face the challenges of the times. The school believes that students with a Sabis education, especially in a multicultural setting, will be able to provide leadership throughout the world.

2.) SCHOOL OBJECTIVES

A. What are the school's broad academic objectives for student learning?

The Sabis International Charter School is intended to be a college-preparatory school having as its main objective preparing students for success in college and for a life of continuous learning. The broad academic objective of the Lower School (Kindergarten - Grade 5) is to provide students with a solid academic foundation to equip them with the knowledge and skills needed for the rigorous program of studies and the more conceptual learning expected in the Upper School. Students are challenged to strive for excellence and to achieve their individual potential. In all grades, the skills of reading, writing, abstract reasoning, and problem solving are emphasized. In the Upper School, where the more formal college-preparatory training begins, abstract reasoning and critical thinking, considered crucial to the learning process, are emphasized in all disciplines.

The broad academic objectives can be summed up as follows:

- *Qualify every student for college.
- *Provide each student with a well rounded education strongly based on a good mastery of English and Math.
- *Enable students to acquire a good mastery of a second language.
- *Train students in logical reasoning and critical thinking.
- *Train students to sustain an intellectual effort for long periods of time.
- *Maintain a general school environment that creates excitement about learning and fosters a love for continuous learning.

B. Describe any non-academic goals for student performance.

Students are expected to

- *uphold high standards of conduct and promote ethical and civic values;
- *make informed decisions on social issues;
- *defend their convictions and reverse negative peer pressure;
- *participate in extracurricular activities, school management, and community work;
- *foster the value of cooperation, be willing to help others and to work in teams; and
- *develop a true understanding of the peoples of the world through an appreciation of differences as well as similarities.

C. What type of community environment do you hope to foster at your school?

The school maintains and supports a community environment which fosters:

- *Tolerance-- turning cultural differences into sources of enrichment
- *Ethical and Moral Values
- *Civic Responsibility
- *Active Cooperation
- *Health Consciousness
- *Environmental Responsibility

The school's climate welcomes parents and grandparents as volunteers, class visitors, and enrichment instructors in areas of expertise or interest.

Student Life is the vehicle that empowers students to make a difference in their own lives and others by giving them opportunities to develop the strength of character and confidence that enables them to reverse negative peer pressure and to acquire important "life" skills in communication, cooperation, problem solving, and global citizenship. Student Life sets the climate and provides the discipline which makes teaching more effective. It encourages students to develop self-control and reduces the need for teacher or administrative intervention..

The Student Life Organization provides leadership opportunities for students in all aspects of school life. There are four main areas, each headed by a Student Prefect (student group leader), which are; academics, sports, activities, and school management. The Student Life Organization provides a structure in which students can develop leadership skills, organizational experience, and strength of character while serving their school. The expectations for Student Life are congruent with the philosophy and goals of the total school program.

Student Prefects involve other students in organizing and implementing activities in the following areas:

- ***academic** (set up tutoring sessions for those students who need help with those students who can provide expertise, bring together and oversee study groups, develop after school and weekend academic events, such as Math League and intensive remedial tutoring)
- ***sports** (sports events, faculty/student games, weekend sports activities, pep rallies and school spirit events)

***activities** (clubs and social events - science, math, computer, ski clubs; yearbook, newspaper, literary magazine; overnight "lock-ins," special events such as Halloween Haunted House and spring proms)

***school management** (student behavior and attitude, motivation, recognition, respect for and care of school property, school wide management including traffic patrol, playground, cafeteria, computer lab, library, hall monitors, etc.)

School management is a particularly important area; every student gets an opportunity to participate, and is encouraged to do so.

3.) STATEMENT OF NEED

A. Why is there a need for this type of school ?

General observations

The frequently quoted 1983 U.S. education analysis, commissioned by President Reagan and published by the National Commission on Excellence in Education, in its report "A Nation at Risk," highlighted that the current education of U.S. children is seriously lagging behind average world-class standards and foreign student performance. The 1993 ten-year anniversary review and many other highly publicized surveys, analyses, official and anecdotal reports have concluded that necessary improvements have not yet been achieved to this date.

More than anything, the future of this state, the whole country and in many ways the entire world, depends on the cultural and social development of the more than 40 million school-aged children in the U.S.A. Dramatic changes need to take place immediately to catch up with the leading countries in the world. A further decline or even stand-still of U.S. education would be disastrous for the country and the world, since a weak educational base of the number one economic, political and military power in this world has a detrimental impact on countries and people worldwide. The U.S. needs to regain the leadership role in primary and secondary education. There is ample proof that government inertia and grid-lock are keeping the current public school system from doing it on its own. It needs help and innovative alternatives from the outside and from entrepreneurial third party providers.

Specifically, existing public school systems are too bureaucratic and inflexible. They are subject to all the regulatory restraints of the district. Change, innovation, global orientation and attention to very high academic achievement along with meaningful assessment and accountabilities are harder to implement in such an environment.

Teacher training and accountability systems for teachers, students and the entire school may

fall victim to day-to-day classroom duties, operations, diluted budgets, poorly defined outcomes and changing or even hidden agendas. Overall the traditional teaching methods may not be able to keep up with global competitiveness and educational needs for the 21st century. Many new and additional challenges relating to population diversity and social issues have to be dealt with.

"Equal educational opportunity for all" is an important goal for public schools. That combined with an attempt often times to "be all things to all people" and offering an all-inclusive curriculum may hurt the quality and performance in core subjects. Those subjects are the essential building blocks which build the foundation for a process of lifelong learning and professional as well as civic development and success.

Site-specific comments

Additional and more specific needs analyses will be developed once a specific site and community has been found. However, most sites reviewed on a very preliminary and overall basis appear to have a need for a widely accessible, top-notch college preparatory school focusing on optimal student learning with a well developed and balanced curriculum, higher student and teacher expectations, accountabilities and assessments in a global context. There is a need for a school where teachers and administrators believe that students are capable of learning college preparatory material and where expectations are high for all students.

Various organizations and individuals have looked at the SABIS system and have provided feedback and/or assistance to the SABIS organization in trying to locate an appropriate site where a **SABIS INTERNATIONAL CHARTER SCHOOL** could make a significant impact on changing options, opportunities and lives of currently underserved children. This includes:

- * CEO's for Fundamental Change in Education
- * The Archdiocese of Boston
- * The Pioneer Institute for Public Policy Research
- * other local business people, educators, university and community contacts that prefer to remain unnamed for now

B. Why would THE SABIS INTERNATIONAL CHARTER SCHOOL help to effectively address this need ?

As a well established and recognized world leader in college education, Massachusetts should also take the lead in innovating and reforming primary and secondary education. A Sabis school could make significant and bold contributions to a successful endeavor. Sabis schools are locally managed and governed and can shape their policies, curriculum and teaching style within the Charter School guidelines freely to the local needs and adapt them whenever

necessary.

The SABIS system focuses on solid core subjects such as world languages, math and sciences in addition to a well balanced curriculum of liberal arts and physical education. High achievement in the core subjects is essential for on-going education after high school graduation.

The SABIS teaching methods have been developed in five different countries over a period exceeding hundred years and under very challenging political and social circumstances teaching children from many different national, religious, racial and social strata. This brings a great strength for dealing with the numerous diversities found in many needy areas in Massachusetts.

Track Record in achieving Educational Excellence

The schools that belong to the Sabis Group have consistently succeeded in qualifying almost all of their students to join and graduate from universities of many countries, including MIT, Harvard, Princeton, Stanford, Imperial College, Oxford, Cambridge, McGill, etc.

Experience in Multicultural Environment

Experience in widely different cultures and environments throughout three continents as well as experience in a multicultural environment in one school. For example, there are 70 different nationalities in one of the SABIS schools.

The SABIS system is based on a challenging, well balanced yet focused curriculum and a strict student, class, teacher and school accountability system, the computerized Academic Monitoring System (AMS), which carefully and regularly tracks and monitors student, class, teacher and overall school performance.

There is ongoing development of teachers and curricula continuously improving the effectiveness of the system and the school for the students.

The SABIS System has a global orientation in two ways:

- 1) World language instruction by native teachers starting in Kindergarten or earlier so that students become truly bilingual and bicultural by graduation.
- 2) Achievement of highest academic standards measuring up to the best countries and schools in the world as measured by external tests such as the International Baccalaureate, the United States' Advanced Placement tests, the United Kingdom's GCE, the German Abitur.

THE SABIS INTERNATIONAL CHARTER SCHOOL will not only complement

existing public schools but also challenge them to higher performance themselves. It fills a critical gap as a top-notch college preparatory school.

Site-specific comments

Communities under review and discussion include:

Boston inner-city (East, South, Dorchester, etc.), Brighton, Brockton, Cambridge, Haverhill, Lawrence, Lowell, Lynn, New Bedford, Newton, Peabody, Quincy, Randolph, Springfield, Somerville, Waltham, Weymouth, Worcester, etc.

None of the discussions and/or negotiations have come along far enough to disclose conclusive analyses, statements, and commitments. In particular, specific contacts need to be established with local community groups, district personnel and parent representatives to establish the viability of a particular location and to develop relationships. However, discussions about specific school facilities have taken place and will likely continue with the Archdiocese of Boston.

4.) SCHOOL DEMOGRAPHICS

A & B. Describe the area where the school will be located. Why was this location selected? Are there other locations suitable to the needs and focus of the school?

A specific facility has not been secured. As described under 3.) above we are working with various groups to locate a building suitable for efficient school operations and a well balanced learning and child development program. Various areas also listed under 3.) are under consideration for the best match between local need and our diversity focused, highly academic college preparatory program. More specific analyses will be prepared and submitted once a particular area and facility have been narrowed down. School District Profile sheets obtained for the named districts, from the Executive Office of Education, all indicate that student diversity, current dropout rates and average performance levels represent the type of scenario where **THE SABIS INTERNATIONAL CHARTER SCHOOL** could be of great service to the students and community needs.

C. Describe any unique characteristics of the student population to be served.

Students with normal or slightly below average through gifted intelligence will be successful in the demanding SABIS college preparatory programs if they are willing to accept our

discipline and are eager to learn. Students must adopt a work ethic developed in class, at home and through student life. The greatest reward we can receive is from leading a currently underserved child to high levels of personal development and college preparatory academic performances. Special needs of a more unusual nature cannot be served with the resources of a single school with limited numbers of students and the usual district funding.

D. What is the school's anticipated enrollment?

If permitted under MA Charter School Law, the school at its maturity would enroll 1,200 students in grades kindergarten through 12. For the first year (1994 or 1995), the school plans to start with grades Kg through 8 with 2 sections of most grade levels (approximately 325 students); then add grades 9 through 12 the second year of operation.

E. What grade levels will be served? How many students are expected to be in each grade or grouping?

See "D" above. Students will be grouped in the following way:

Kg	3 sections of 20
1	3 sections of 20
2	3 sections of 22
3	3 sections of 24
4-8	3 sections of 30 at each grade level
9-12	100 students each grade level

5.) RECRUITING AND MARKETING PLAN

A & B. Demonstrate how you will publicize the school to attract a sufficient pool of applicants. Specifically, what type of outreach will be made to potential students and their families?

A variety of methods will be used to publicize the school and attract applicants, both students and teachers. We have successfully attracted a diverse student body and teaching staff (no small feat in a state where the minority population is less than eight per cent) here in Minnesota by advertising in major, minority, and neighborhood newspapers and on selected cable TV channels and radio stations; by visiting United Way youth-serving agencies and religious churches, mosques, temples, etc.; by speaking before community and civic organizations; by sending press releases to local papers; and by hosting open house evenings and other special events at our school. Local businesses, realtors, pediatricians and public health centers, day care centers, youth sports organizations, and schools are also good referral sources. After the first few years, the majority of applicants come from referrals from current (satisfied) parents. It is obvious that the press will take a major interest in the new

Charter schools and general publicity will occur as a result. This will heighten awareness of parents seeking a different type of education for their children. Our efforts will be timed to take advantage of this publicity.

Examples of ads and open house cards are enclosed under Index Tab A)

Open Houses offer a unique opportunity for parents and their children to learn about **The SABIS International Charter School**. We have found that parents want to talk to teachers, ask questions, review textbooks and other teaching materials, hear about the curriculum and extra-curricular activities, and, in general, become familiar and comfortable with what they learn about us. Parents weigh very carefully decisions involving their children. We believe that it is in the school's and the parents' best interest to share enough information about each other so that a good match is made. Other events may be held at the school once neighborhood needs are known. (see open house invitation under Index Tab B)

6.) ADMISSIONS POLICY

A & B. Describe the admission methods and standards you will use to select students. Explain how these policies further the mission of the school in a non-discriminatory fashion.

The **Sabis International Charter School** will be a college preparatory school, but we do not see it as being highly selective in admitting students to the school. The purpose of the admissions process is to enable The School, applicants, and parents to learn as much as possible about each other in order to determine the suitability of The School's environment for each applicant. It is a process of gathering and giving information. In order to maximize the chances that a good match is made between incoming students and **The SABIS International Charter School**, it is important that families complete the following steps:

- * attend an open house to learn about school philosophy, curriculum, and expectations for students and parents
- * complete an application (copy attached under Index Tab C)
- * send prior school records and two recommendations to the school
- * complete admissions testing (grade level will determine which tests will be given to student)

Successful students at **The SABIS International Charter School** will be eager to learn and have an IQ in the range of slightly below average to gifted. We believe that all our students can learn what we teach. At the kindergarten and lower primary we administer the Gesell, a test indicating developmental readiness, and our own tests indicating achievement levels in math and reading. In the upper primary, we use the Otis-Lennon, a group ability test, and the

ERBs (Educational Records Bureau) in reading comprehension and math computation. At the high school level, we also administer our own tests for math placement. Remedial classes may be needed for some students.

Students from a wide variety of backgrounds will be able to successfully complete our tests. We currently enroll students from families who have recently immigrated to the US and may or may not speak English, from all minorities (Asian, African-American, Hispanic), and from different economic backgrounds (AFDC to upper middle class.) In our upper school in Minnesota, where our scholarship program is in effect and thus ability to pay is not a factor, sixteen percent of our students are African-American, eleven percent are Asian, twenty-five percent have parents born outside of the US (or they themselves were), and 48 percent are white. Again, this is in a state where the minority population is under eight percent.

Students will be selected for admission to **The SABIS International Charter School** on the basis of information gathered during the admissions process. Student attitude towards learning is an important factor. We expect seriousness of purpose from our students. Criteria for evaluation include motivation, social and emotional development, interests and talents, the candidate's ability to add diversity to the student body, and the ability of The School to meet the needs of the candidate.

The School strives to help students develop a lifelong enthusiasm for learning, an eagerness to attain excellence, and an attitude that welcomes diversity and transcends any barriers of gender, nationality, race, or religion. The School actively seeks diversity in its student body.

7.) PROFILE OF FOUNDING COALITION

A. Describe the make-up of the group or partnership that is working together to apply for charter.

B. Discuss how the group came together, as well as any affiliation with existing schools, educational programs, businesses, non-profits, or any other entities or groups.

The origin of the founding group is the SABIS International School organization which has a domestic school model in **THE INTERNATIONAL SCHOOL OF MINNESOTA**. It belongs to a group of 10 schools in 5 countries that had its start in 1886 in Beirut, Lebanon. The successful teaching method is known throughout the Middle East as one of the finest college preparatory programs. This educational system was developed and refined over the past 100 years and is described in great detail throughout this application. (See Index Tab L)

The organization is owned and operated by second and third generation members of the founders. Here are the key members currently forming the founding coalition for the

proposed **SABIS INTERNATIONAL CHARTER SCHOOL** in Massachusetts :

Mrs. **Leila Charles Saad**, Chairperson and Co-Founder of the **SABIS FOUNDATION**.

Mrs. Saad holds a B.A. with a major in English Literature and a minor in Education from the American University of Beirut, Lebanon; she joined The International Schools of Choueifat in 1954; became Vice Principal in 1961 and President in 1981. She also served for over 12 years as Chair of the Board of Trustees, University College, Beirut, Lebanon. Mrs. Saad is the daughter-in-law of the founder, is a French citizen but lives in Bath, England, when she is not traveling to the other schools.

Mr. **Ralph Bistany**, M.S. in Physics, American University of Beirut, Lebanon. Mr. Bistany was born in Methuen, MA, but grew up and was educated in Beirut. He joined The Choueifat Schools in 1955 as a teacher of mathematics, became Assistant Director in 1957 and Director General in 1961. Mr. Bistany is also a French citizen but travels between the various schools during most of the time. He considers French his most "comfortable" language of the four in which he is fluent.

Mr. **Carl Bistany**, M.A. in Math, M.A. in Computer Science, Syracuse University, Syracuse, New York. CEO of Emirates Computer Co., Abu Dhabi, UAE; Board Member and Vice President of the Sabis Foundation, which holds ownership positions in most of the ten International Schools. Mr. Bistany is also a member of the Board of the Institute for Social and Economic Policy in the Middle East at the JFK School of Government, Harvard University in Cambridge, MA.

Mrs. **Tracy S. Whitehead**, Director of Operations and Community Affairs since the beginning of **THE INTERNATIONAL SCHOOL OF MINNESOTA** in 1985. In 1982 Mrs. Whitehead was a candidate for the State Senate. She is a former and current President of several community, political and business organizations including the exclusive and prestigious Minnesota Women's Economic Roundtable which she currently chairs.

Mrs. **Nadia Reda**, B.A. Cairo University, M.A. in Linguistics and A.B.D. in English from the University of Minnesota. She also taught at both institutions before she started teaching in Public Schools, Intermediate District 916, White Bear Lake, MN. In 1985 Mrs. Reda started working for **THE INTERNATIONAL SCHOOL OF MINNESOTA** as Assistant to the Director of Operations, moved to Director of Admissions, and then to Assistant Head of School in 1990 and was promoted to Head of School in 1992.

Mr. **Udo E. Schulz**, MBA, CPA, a Minneapolis businessman and parent of a student at **THE INTERNATIONAL SCHOOL OF MINNESOTA**. Mr. Schulz is handling an international expansion project for **THE INTERNATIONAL SCHOOL OF MINNESOTA**. For over 25 years Mr. Schulz worked in various management positions of several international companies in Germany and in the U.S. including 12 years as President of two medium-size firms in Minnesota.

C. Include any plans for further recruitment of founders or organizers of the school.

The School is quite interested in enlisting any or all of the following groups:

- *co-owners, investors
- *sponsors, advisors
- *minority role-models for students
- *founders of other charter schools that would contract **with THE SABIS INTERNATIONAL ORGANIZATION** for running and managing their Charter School

8.) TIMETABLE

A. Discuss a timetable of events leading to the opening of a charter school.

Events leading to the opening of a **SABIS International Charter School**:

1. March - July 1994
 - *find suitable facilities, negotiate purchase or lease
 - *procure all occupancy permits (fire, health, building, etc.)
 - *remodel as necessary
2. May-August 1994
 - *order furniture, equipment
 - *order textbooks, supplies
3. March-August 1994
 - *hire school director, faculty, support staff
 - *begin training program in **SABIS** methods and systems
 - *send director and lead teachers to Minnesota school for intensive inservice
4. March and on-going
 - *hire public relations/community outreach person
 - *~~modify existing~~ PR materials for Massachusetts
 - *develop and implement student recruitment plan
 - *begin admissions process
 - *modify existing student and parent handbooks (see Index Tab D)
 - *modify faculty policy and procedure handbook (see Index Tab E)
 - *adapt existing book list (see Index Tab F) and curriculum (see Index Tab G)

D. Mike

Abu Dhabi, 31st August 1985.

Dear Sir,

With reference to our earlier discussions regarding the quality of secondary schools in general and the International School of Choueifat in Abu Dhabi in particular, I would like to explain my opinion as follows.

My daughter has been one of your pupils from september 1981 till april 1983. Before we made a decision to which school we were going to send her, we asked information from several people and we decided to try yours.

The first couple of months it was very difficult for her, mainly because of lack of English.

After a while she got used to the language and to the school-system and she started enjoying it.

Before she joined Choueifat she went to the primary school in Holland which gives never homework and you attend lessons only for 28 hours a week. So you can imagine that the increase in working hours was very hard for her.

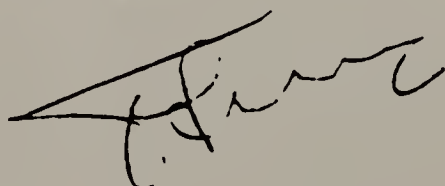

The time she spent at your school was very tough and she had to work real hard, but she always enjoyed it. And not to forget, she learned a lot.

In April 1983 we went back to Holland and she started on the secondary school there. It does not make much difference which one you choose, because you will not find one like Choueifat. The democracy from the pupils is very advanced. The teachers are superior in name in the classroom, but children do as they like. Because it is very difficult as schoolmanagement to remove children from your school (they will end up in court) teachers get so frustated that there is a very high sick percentage. During a couple of weeks I checked the not given lessonhours from my daughter: an average of 1 hour every day, for many different reasons.

Having experienced the difference between Choueifat and schools in Holland, we are very happy to be back in Abu Dhabi, so she can join your school again, because all of us believe in your system.

Keep up the good work.

Yours

Mrs. Nadia Reda
Headmistress
International School of Minnesota
Eden Prairie, MN 55344

Dear Nadia,

I can hardly believe that we are already nearing the end of the 1991-92 school year. With all good intentions, I have somehow managed to let the year slip by without keeping in touch. It has been an especially busy year for all of us. Since we were in the Twin Cities last year so unexpectedly, there were many things here in Dhahran that we had left undone and unattended - we have paid the price this year, trying to get back on track. I am beginning to feel now that we are caught up (just in time to go away again for the summer!).

I had meant to keep in touch with all of you at ISM, since you were so important in our lives last year, and filled such a void with a school that was at once familiar and excellent. Both Dina and Sami had such a good experience with you. We often talk of what it was like for them to be in school in the States. Their teachers and friends were all wonderful. Sami sends regards to Mrs. Herbranson, to Ms. Hugo, to all his other teachers and friends. Of course you have all recently seen Dina, who told me she visited when she was in MSP over spring break. She is really happy at Wellesley, has registered for her first two M.I.T. courses this semester (it seems most of the architecture courses are at M.I.T.), and has nothing but warm memories of being at ISM and one of it's first graduates. She plans to come to Dhahran in mid-May, when finals are over, then we all hope to be in the Twin Cities in July and August. We'll plan to see you then.

To the Class of 1992 - best wishes - may your futures be bright. I'm wondering where they will choose to be next year... can't wait for all the news. I really wish we could be there for the second graduation ceremony! We'll be with you in spirit.

Hello to all.

Linda Amin

Dr. Dale Koch
6385 Beach Road
Eden Prairie, Minn.
55344

Dear Dr. Koch,

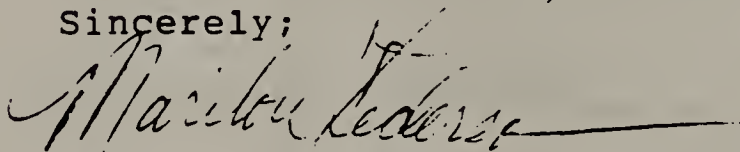

→ The International School of Minnesota and its staff have exceeded my expectations in educating my children. I am extremely pleased with the academic curriculum and the close monitoring of each child's progress and areas of strengths and weaknesses. The follow through on results of observation and testing has been thorough. All of the teachers and staff that Kori and Kelsey have been in contact with have been sensitive, challenging and cooperative. The transition from Montessori to The International School for both of my girls was difficult and yet a positive experience because of the caring nature of the school. I appreciate the consistency of concern and sensitivity to the needs of my children.

I have been most impressed with Sue Hugo and her ability to recognize and meet the individual needs of students. Kori has had an especially positive and growth producing relationship with Miss Hugo. We look forward to continuing this relationship next year in fifth grade in the consistent on-going math program with math instruction by Miss Hugo. We also appreciate the consistency in English and Spanish.

→ As a Pediatric Practitioner in Edina, I come in contact with 20-30 families daily and am frequently asked for educational recommendations. I am most pleased to tell them that I entrust my children's education to I.S.M. because of the small class sizes, the academic accountability, the caring nature of the school, the second language, and the great staff.

Our family looks forward to an ongoing educational partnership with The International School of Minnesota. Thank You.

Sincerely;

Marilou Pederson

FEB. 20 1940

Dear Dr Keen,

Following our week-long visit to Vancouver, Louisa began to have some doubts about remaining in Minneapolis on her own for three months. Although the desire to stay on at school & complete the year is extremely strong, the emotional needs & concerns have surfaced, making the decision more complicated.

For the last few weeks she has been vacillating between "staying" & "going" and has given both possibilities a lot of thought. However, she has now concluded that although her mind tells her to stay, her heart feels she should go with us. Consequently, Louisa's last day at school will be March 8 since we depart for Vancouver on March 9.

A few chosen words cannot really express the pleasure & pride we have felt that Louisa was able to attend the I.M.S. this year. It has proven to be a most beneficial year for Louisa, both academically & socially. You have

Mrs. Barrientos:

As you celebrate your 100th day with the International School of Minnesota, I wanted to take this opportunity to share a very special "THANK YOU" for "in such a wonderful addition to Kristina's life. As an educator myself, I notice and very much appreciate all of the little "extra things" each and everyone of you has given to Kristina on a daily basis. I also understand that you are able to do so not only with just her, but with each of the youngsters with which you work! Such an outstanding commitment and follow-through deserves special recognition.

As you have probably noticed, I expect the best- I think our American youngsters face challenges in their future that only the most dedicated educators in their daily learning experiences will be able to help them prepare for. The competition they will face, and the problems our bright young Americans WILL HAVE TO try to solve in cooperation with their other "friends from abroad" can only hope to be successfully tackled with the skills; affective, as well as mental, which you are now little-by-little, instilling in your "charges". From what I have seen not only in the skills and attitudes Kristina has demonstrated, but also in the various programs, fieldtrips, and verbal/written communications my husband and I have had with you four, there is no doubt in our minds, that you "are doing your job" most excellently. You ACCEPT and try to synergize comments, constructive criticism in a positive way. Most importantly, none of you has ever become defensive regarding comments or suggestions. You thereby have left open channels with which you may

continue to improve. -- just one more evidence of your ability to accept the opinions and/or expertise of others. Such an openness and flexibility on the part of educators is noteworthy and most commendable! Not all teachers in our field have the strength of character nor strong background to allow such open parent-teacher communication.

I cannot speak highly enough of you four, and since this week "marks a celebration of sort", my husband and I simply wanted to share our feelings with you. Please continue the good work, and if we as parents can help in any way to facilitate your good work, please do not hesitate to contact us.

Most sincerely,

Julie Archer-Kath

February 28, 1986

We first learned of the International School, last August, 1985, from an article in a local newspaper. Several stated objectives caught our attention, which prompted a visit. We were sufficiently impressed by the school's background and those we met, that we decided to enroll our nine year old daughter, Rachel, in the fourth grade.

What were the concepts that seemed so appealing? Certainly, one was that education must be viewed as educating the whole child. The program must be academically sound, and the child should be comfortable in the learning environment. The student should be taught to recognize their feelings, express them, and then deal with them positively. With this accomplished, children can progress academically. Right critical thinking is a prime goal of the school. Another is to appreciate and accept those who are different from ourselves, and thus learn more about who we are. This goal is greatly enhanced by the language program at the school and the diverse backgrounds of the student body and faculty.

The philosophy of constantly testing for learned academic skills, has proved beneficial for Rachel. All learning comes in steps, and regular testing gives the child confidence in their academic proficiency, thereby allowing them to proceed to the next and more difficult step. Through constant testing the child and teacher are aware of their progress on a timely basis, which becomes an important motivating factor for the teacher as well as the child.

In many schools, classroom discipline is ineffective and impedes the learning process. A fresh approach to this problem is part of the school's philosophy of removing a disruptive child from the classroom. This accomplishes several things. Valuable learning time is not wasted, and negative feelings toward the teacher are reduced. Also, it allows the disruptive child to express the feelings which are causing the behavior in a private, non-humiliating atmosphere, with a professional that is qualified to help the student.

The end of Rachel's first year at The International School is rapidly approaching. Simply stated, our daughter is "happy" at school, and that is one of the best indicators of all. She has mastered some difficult academic concepts, improved her study habits, and developed a more positive attitude, which allows her to see and feel proud of her achievements. We want these skills to continue to blossom and grow, right along with the International School! The excellent school staff has provided the expertise and encouragement that has nurtured Rachel's growth.

We have three children, ages 5, 10, and 15, and are involved in high school, elementary, and nursery school activities. In May of this year, our 4th child will arrive and add a new dimension to our family. The philosophies of the International School reinforce what we, as parents, are trying to teach as a family: Namely, that learning is fun and we as individuals are part of a life-long process of growth, which includes the acceptance of self and the realization that we live in an International world of diverse peoples.

TUFTS UNIVERSITY

Department of Mathematics

RECOMMENDATION FOR ALI HAMMOUD

While still a high school student, Ali Hammoud took Math 11, our introductory calculus course at Tufts, in summer school in 1984. His performance, in the rather tough version of that course as I taught it, was very impressive. On exams, with a class median ranging from 40 to 79 points, Hammoud's scores ranged from 74 to 99. He showed a quick grasp of the subject, and was a careful, persistent and incisive worker on homework problems. He was highly motivated, asking me often about difficult problems which had not been assigned. Beyond his performance as a student, I found him a polite and very pleasant young man. I would recommend him very highly to any undergraduate institution.

Sincerely,

Zbigniew Nitecki
Professor

Dear Sir:

Every term a list of students who have achieved the special distinction of a 3.0 grade point average is published at Lehigh. It is a list I am particularly interested in since it is known as the Dean's List and it often contains those students who are going to be Lehigh's success stories in the future.

Among this fall term's list in the College of Arts and Science was Dilip Manganlal who recently graduated from the International School of Choueifat. We are now especially proud of him as I am sure you were a few months ago, and I thought it a good time to let you know that he has made a successful start in his undergraduate career.

Office of the Dean

Dear Mr. Tabasi:

Because of the excellence of your academic record, I am pleased to inform you that you are among those eligible for selection as the student speaker at the annual Tropaia Exercises to be held on Saturday, May 24, 1986, in Gaston Hall at 7:30 PM.

The Committee on Graduation decided last year that all seniors with a cumulative grade point average of 3.65 or higher as of January, 1986 would be eligible for the honor of selection as Tropaia student speaker. The Committee asks that ballots bearing the names of qualified and interested seniors be submitted to all members of the senior class who will elect the speaker.

I hope you will agree to submit your name for this honor. The student selected will have his or her speech reproduced by this office and distributed after its presentation to the guests.

Please indicate your decision below and return this signed notice to Mrs. Harrison in the Foreign Service Dean's Office no later than Friday, April 4.

Sincerely,

A handwritten signature in dark ink, appearing to read "Peter F. Krogh", written over a horizontal line.

Essential concept list based on topics/grade levels tested.
grade level introduced
denoted by ().

I. GRAMMAR

- A. Sentence characteristics.
 - 1-6 (K) 1. Definition.
 - 1-6 (K) 2. Word order in sentences.
- B. Sentence types.
 - 1-6 (K) 1. Declarative.
 - 1-6 (K) 2. Interrogative.
 - 3-6 (2) 3. Exclamatory.
 - 4-6 (3) 4. Imperative.
- C. Sentence structure.
 - 4-6 (K) 1. Simple sentences.
 - 4-6 (2) 2. Compound sentences.
- D. Parts of the sentence.
 - 1-6 (1) 1. Complete subject.
 - 4-6 (1) 2. Simple subject.
 - 2-6 (2) 3. Compound subject.
 - 6 (1) 4. Understood subject (you).
 - 1-6 (1) 5. Complete predicate.
 - 4-6 (1) 6. Simple predicate.
 - 5-6 (3) 7. Compound predicate.
 - 6 (2) 8. Inverted order of subject and predicate.
 - 6 (1) 9. Predicate nouns.
 - 6 (1) 10. Predicate adjectives.
 - 5-6 (3) 11. Direct objects.
 - 6 (4) 12. Prepositional phrases.
- E. Nouns.
 - 1-6 (1) 1. Definition.
 - 1-6 (1) 2. Singular forms.
 - 1-6 (1) 3. Plural forms.
 - 3-6 (3) 4. Possessive forms.
 - 1-6 (1) 5. Common and proper.
 - 6 (4) 6. Appositives.
- F. Pronouns.
 - 1-6 (1) 1. Definition.
 - 1-6 (1) 2. Personal.
 - 4-6 (4) 3. Possessive.
 - 6 (1) 4. Interrogative.
 - 5-6 (2) 5. Antecedents.
- G. Verbs.
 - 1-6 (1) 1. Definition.
 - 1-6 (1) 2. Action.
 - 4-6 (1) 3. Main.
 - 2-6 (2) 4. Helping/auxiliary.
 - 6 (1) 5. Principal parts.
 - 2-6 (1) 6. Regular.
 - 2-6 (1) 7. Irregular.

- 2-6 (1) 8. Forms of "be".
- 5-6 (1) 9. Linking.
- 1-6 (1) 10. Present tense.
- 1-6 (1) 11. Past tense.
- 5-6 (5) 12. Future tense.
- 6 (2) 13. Perfect tenses.
- 1-6 (1) 14. Contractions.
- H. Adjectives.
 - 1-6 (1) 1. Definition.
 - 6 (3) 2. Proper.
 - 1-6 (1) 3. Forms of comparison.
 - 6 (1) 4. Predicate adjectives.
 - 3-6 (3) 5. Articles.
 - 6 (3) 6. Prepositional phrases as adjectives.
- I. Adverbs.
 - 4-6 (4) 1. Definition.
 - 5-6 (5) 2. Forms of comparison.
 - 4-6 (2) 3. Negatives.
 - 6 (4) 4. Prepositional phrases as adverbs.
- J. Prepositions.
 - 4-6 (4) 1. Definition.
 - 5-6 (4) 2. In phrases.
 - 6 (4) 3. Objects of prepositions.
 - 6 (3) 4. Prepositional phrases as modifiers.
- K. Conjunctions; Interjections.
 - 6 (4) 1. Definition.
 - 4-6 (4) 2. Coordinating.

II. USAGE

- A. Sentence usage.
 - 2,5-6(1) 1. Fragments.
 - 3-6 (3) 2. Run-ons.
- B. Verb usage.
 - 1-6 (1) 1. Subject-verb agreement: present tense.
 - 4-6 (2) 2. Subject-verb agreement: helping verbs.
 - 2,6 (2) 3. Subject-verb agreement: compound subjects.
 - 1-6 (1) 4. Subject-verb agreement: forms of "be".
 - 6 (2) 5. Subject-verb agreement: inverted order.
 - 2-6 (1) 6. Irregular verbs.
 - 5-6 (5) 7. Avoiding "could of", "should of".
 - 6 (6) 8. Use of "borrow", "lend".
 - 4-6 (4) 9. Use of "let", "leave".
 - 6 (6) 10. Use of "lie", "lay".
 - 6 (6) 11. Use of "rise", "raise".
 - 4,6 (4) 12. Use of "sit", "set".
 - 6 (6) 13. Use of "teach", "learn".
- C. Pronoun usage.
 - 5-6 (2) 1. Agreement with antecedents.
 - 6 (2) 2. Clear antecedents.
 - 3-6 (2) 3. Using pronouns correctly with nouns.
 - Avoiding unnecessary pronouns, using we/us.
 - Avoiding them as a demonstrative pronoun.
 - 2-6 (2) 4. Naming self last.
 - 5-6 (3) 5. In compound objects.
 - 2,5-6(2) 6. In compound subjects.

- 4-6 (3) 7. Pronouns vs. contractions.
- 6 (6) 8. Who, whom, whose.
- D. Adjective/adverb usage.
 - 4-6 (3) 1. Choosing between adjectives and adverbs.
 - 1-6 (1) 2. Forms of comparison.
 - 3-6 (3) 3. Choosing the correct article.
 - 4-6 (3) 4. Avoiding double negatives.
 - 5 (5) 5. Use of fewer, less.
 - 5 (5) 6. Use of between, among.
 - 6 (6) 7. Use of in, into.
- E. Conjunction usage.
 - 5-6 (4) 1. Choosing coordinating conjunctions and correlative conjunctions.
- F. Frequently confused words.
 - 3-6 (3) 1. Use of "are", "our".
 - 3-6 (3) 2. Use of "than", "then".
 - 3-6 (3) 3. Use of "their", "there", "they're".
 - 3-6 (3) 4. Use of "to", "two", "too".

III. MECHANICS

- A. Capitalization.
 - 1-3 (1) 1. The pronoun "I".
 - 1-6 (1) 2. First word of the sentence.
 - 1-6 (1) 3. Proper nouns.
 - 2-6 (1) 4. First word of greeting and closing in letter.
 - 2-6 (2) 5. Titles of people.
 - 2-6 (1) 6. Titles of books, poems, stories, reports, songs, articles, magazines, newspapers.
 - 2-6 (2) 7. Abbreviations.
 - 3-6 (2) 8. First word of a direct quotation.
 - 4-6 (4) 9. First word of main topic and subtopic in outline.
- B. Punctuation.
 - 1-6 (1) 1. Period: after statement.
 - 4-6 (4) 2. Period: after command or request.
 - 2-6 (2) 3. Period: after abbreviation.
 - 1-6 (1) 4. Question mark: after interrogative sentence.
 - 3-6 (2) 5. Exclamation mark: after exclamatory sentence.
 - 3-6 (1) 6. Comma: after greeting in a friendly letter.
 - 3-6 (1) 7. Comma: after closing in a letter.
 - 2-6 (2) 8. Comma: to separate names of city and state.
 - 2-4 (2) 9. Comma: to separate day from year.
 - 3-6 (3) 10. Comma: in a series.
 - 4-6 (4) 11. Comma: in direct address.
 - 4-6 (4) 12. Comma: in a compound sentence.
 - 4-6 (4) 13. Comma: after introductory words.
 - 6 (6) 14. Comma: appositives.
 - 2-6 (2) 15. Apostrophe: in contractions.
 - 3-6 (2) 16. Apostrophe: to show possession.
 - 3-6 (2) 17. Quotation marks.
 - 3-6 (3) 18. Quotation marks: with other punctuation.
 - 6 (5) 19. Colon.
 - 2,4-6 (2) 20. Underlining titles.

IV. COMPOSITION

All students in grades 1-6 are introduced to the following five steps in the writing process and are evaluated appropriately for their grade level.

A. Steps in writing.

1. Prewriting.
 - a. Brainstorming.
 - b. Making lists.
 - c. Discussing experiences.
 - d. Choosing a topic.
 - e. establishing purpose and audience.
 - f. Observing.
 - g. Taking notes.
 - h. Outlining.
2. Writing a first draft.
3. Revising.
 - a. Adding details.
 - b. Making words more exact.
 - c. Changing order of ideas.
 - d. Adding dialogue.
 - e. Writing new beginnings and endings.
 - f. Varying sentence length and structure.
 - g. Conferring.
4. Proofreading.
 - a. Checking spelling, mechanics, and grammar, and usage.
5. Making a final copy.

B. Skills.

1. Varying sentence length.
2. Combining sentences/varying sentence structure.

4-6 (4)

2-6 (2)

Concepts of 1st Grade Mathematics

Example Number	Page No.
1. Recognising numerical symbols 1-5	1
2. Recognising sets 1-5	1
3. Writing numerical symbols 1-5	1
4. Writing the numbers 1-5 in order	2
5. Recognising numerical symbols 6-12	2
6. Recognising sets of 6-12	2
7. Writing numerical symbols 6-12	2
8. Counting 1-12 in sequence	3
9. Writing 1-12 in order	3
10. Writing missing numbers 1-12	3
11. Writing the number that comes <u>AFTER</u>	3
12. Understanding <u>greater</u> than	4
13. Understanding <u>less</u> than	4
14. Addition concept. Add items through to 5	4
15. Recognising and understanding the 'addition' sign +	4
16. Recognising and understanding the 'equal' sign =	5
17. Understanding the meaning of the word 'add'	5
18. Addition equations: motion picture	5
19. Addition equations: static models	5
20. Addition equation: drawing own models	5
21. Addition: understanding zero in addition	6
22. Addition: vertical notation	6
23. Addition: write the problem	6
24. Subtraction: difference through to 5 using counters (practical)	6
25. Subtraction concept using motion pictures	6
26. Terms: Know the meaning of the words "subtract" & "take away"	7
27. Signs: Recognising the sign "-"	7
28. Subtraction: cross out to subtract	7
29. Subtraction: understanding zero in subtraction	7
30. Subtraction: vertical notation	7
31. Subtraction: vertical notation. Write the problems	8
32. Addition: count on to add	8
33. Subtraction: count back to subtract	8
34. Place value: Ring the tens. Write the answer in tens and units	8
35. Place value: Recognise and write tens and ones digits	9
36. Place value: Understanding place value models	9
37. Counting: Write the number that comes <u>after</u>	9
38. Counting: Write the number that comes <u>before</u>	9
39. Place value: read and write decades names and numbers	9

40. Place value: counting 2 digit numbers through to 99	10
41. Comparing number: ring the <u>greater</u>	10
42. Comparing number: ring the number that is <u>less</u>	10
43. Ordinal number: recognise position first through to tenth	10
44. Counting: skip counting by 2's	11
45. Counting: skip counting by 5's	11
46. Time: reading time to the hour	11
47. Time: reading the time to the half hour	11
48. Time: writing the time to the hour	12
49. Time: writing the time to the half hour	12
50. Addition: Sums to 12	12
51. Addition: Doubles - Doubles + 1 (sums to 12)	12
52. Problem Solving: Story problems - addition	13
53. Problem Solving: Story problems - subtraction	13
54. Addition: Add three (1 digit) numbers	13
55. Geometry: Identify 3d shapes i.e. cone, cylinder, sphere, cube	14
56. Geometry: Identify 2d shapes i.e. circle, triangle, square & rectangle	14
57. Shape: Find the number of <u>corners</u> on a plain shape	14
58. Shape: Find the number of <u>sides</u> on a plain shape	15
59. Patterns: Finish the shape pattern	15
60. Graphs: Classify objects and complete the Bar Graph	15
61. Graphs: Complete a Bar Graph using tally marks	16
62. Addition: Add 2-digit numbers without trading	16
63. Subtraction: Subtract 2 digit numbers without trading	17
64. Measurement: Comparison - find the longer or/and shorter one	17
65. Measurement: Find the length using a 'paperclip' ruler	17
66. Measurement: Find the length using a centimeter ruler	17
67. Capacity: Estimate capacity - litres	18
68. Temperature: Estimate temperature - degrees Celsius	18
69. Weight: estimate weight - kilograms	18
70. Subtraction: Sums - difference to 18	18
71. Fractions: identify halves, thirds and fourth of a region (eg:  1/2;  1/3;  1/4)	19
72. Fractions: recognise fractions of a set (eg:  1/2)	19

Index of Concepts.

Concept Number		✓ if known
1.	Counting items in a figure.	
2.	Addition of items counted in figures.	
3.	To recognise the addition sign "+".	
4.	To know the meaning of the word "add".	
5.	To know the meaning of the word "sum".	
6.	Addition: Sums through to 12.	
7.	Addition of 0.	
8.	Word Problem: Add, type 1. Have n, given m, how many?	
9.	To recognise the subtraction sign "-".	
10.	Subtraction: Differences through to 9.	
11.	Subtraction of 0.	
12.	Subtraction of a number from itself.	
13.	Terms: "subtract" and "take away".	
14.	To know the meaning of the word "difference".	
15.	Word Problem: Subtract, type 1. Have n, give away m, how many left.	
16.	Recognise the equal sign "=".	
17.	Recognise the not equal sign " \neq ".	
18.	To know the meaning of the word "equal".	
19.	To know the meaning of the words "not equal".	
20.	To know the decade names.	

Concept Number		
21.	Place value: Ring tens, write answer in tens + ones.	
22.	Place value: Write the number from 'tens + ones.	
23.	Place value: Recognising the tens and ones digits.	
24.	Place value: 2-digit no. in words. Write it in numerals.	
25.	Counting: Write the next number or one more.	
26.	Counting: Write the number that comes after.	
27.	Counting: Write the number that comes before.	
28.	Counting: Write the number that comes between.	
29.	Counting: Skip count by 2's.	
30.	Counting: Skip count by 3's.	
31.	Counting: Skip count by 5's.	
32.	Counting: Skip count by 10's.	
33.	Numbers: Recognise even numbers.	
34.	Numbers: Recognise odd numbers.	
35.	Recognise the symbol of "greater than".	
36.	Recognise the symbol of "less than".	
37.	Comparing 2-digit numbers: use $>$ $<$ or $=$	
38.	Comparing: give position, first, second, etc.	
39.	Addition: of doubles.	
40.	Addition: Sums through to 18.	

Concept Number		
41	Addition of 10 to a one digit number.	
42.	Addition of 9 to a number.	
43.	Addition: adding 3 numbers.	
44.	Subtraction: differences to 18.	
45.	Addition/Subtraction: fact families.	
46.	Word Problem: type 2: How many more:	
47.	Time: o'clock	
48.	Time: in ^(long way) 5 minute intervals eg. ^{10 minutes} after 8 o'clock	
49.	Time: ^(short way) written in hours & minutes: eg 8:10	
50.	Time: elapsed time in hours.	
51.	Calendar: order of the months of the year	
52.	Addition: 1-digit to 2-digit nos., no trading.	
53.	Addition: 2-digit to 2-digit nos., no trading.	
54.	Addition: 1-digit to 2-digit nos, with trading.	
55.	Addition: 2-digit to 2-digit nos, with trading.	
56.	Addition: 3, 2-digit + 1-digit nos, with trading.	
57.	Word Problem: type 1, addition with 2 digit nos.	
58.	Word Problem: type 2 addition: eg Ali has 3, Bob has 4 more, how many has Bob?	
59.	Word Problem: type 3 addition: eg Ali has 6, which is 4 less than Bob. How many has Bob?	
60.	Word Problem: type 4 addition: eg If 6 birds die we'll have 9 left. How many to begin with?	

Concept Number		
61.	Patterns: recognise a pattern in a series of nos.	
62.	Shapes: recognise sphere, cylinder, cube, cone	
63.	Shapes: recognise square, rectangle, circle, triangle	
64.	Shapes: no. of sides & corners in a figure.	
65.	Shapes: symmetry, identify a figure ^{with matching} parts.	
66.	Graphs: reading a bar graph.	
67.	Graphs: read a graph using tally marks.	
68.	Picture graphs: each symbol = many items.	
69.	Graphs: co-ordinate graphing	
70.	Subtraction: 2 digit nos. no trading.	
71.	Subtraction: check by addition.	
72.	Subtraction: 2 digit nos. trading tens.	
73.	Tables: reading a price from a table.	
74.	Addition: find price of n similar items by "+".	
75.	Measurement: length using a "paperclip" ruler.	
76.	Measurement: length using a centimeter ruler.	
77.	Measurement: find length to nearest cm	
78.	Measurement: estimate to nearest cm.	
79.	Measurement: find the length of a path.	
80.	Measurement: perimeter of a figure.	

Concept Number		
81.	Place Value: Write 3 digit no. given a figure.	
82.	Place Value: value of each digit from ones to hundreds.	
83.	Place Value: Write the number from ^x hundreds, ⁿ tens, ^m ones.	
84.	Place Value: Write 3 digit number in numerals.	
85.	Counting: Write the 3 digit number that comes next.	
86.	^(3 digit) Counting: Write the number that comes after.	
87.	^(3 digit) Counting: Write the number that comes before.	
88.	Addition: adding 10 to a 3 digit number.	
89.	Subtraction: subtracting 10 from a 3 digit no.	
90.	Addition: adding 100 to a 3 digit number.	
91.	Subtraction: subtracting 100 from a 3 digit no.	
92.	Comparing numbers up to hundreds.	
93.	Addition: 3 digits, no trading.	
94.	Subtraction: 3 digits, no trading.	
95.	Addition: 3 digit numbers, trading ones to tens.	
96.	Addition: 3 digit numbers, trading tens to hundreds.	
97.	Word Problem: (type 1, using 3 digit nos, addition)	
98.	Word Problem: (type 2, using 3 digit nos, addition)	
99.	Word Problem: (type 3, using 3 digit nos, addition)	
100.	Word Problem: (type 4, using 3 digit nos, addition)	

Concept Number		
101.	Subtraction: 3 digit nos. trading tens to ones.	
102.	Subtraction: 3 digit nos. trading hundreds to tens.	
103.	Word Problem: (type 2 using 3-digit nos, subtraction)	
104.	Word Problem: (solve 2 questions add/subtract)	
105.	Multiplication: find sum by repeated addition	
106.	Multiplication: meaning of product (using drawings)	
107.	Multiplication: meaning of product (using drawings)	
108.	Multiplication: order.	
109.	Multiplication by 0	
110.	Multiplication by 1.	
111.	Memorising the answers to "X" questions	
112.	Multiplication by 2.	
113.	Multiplication by 3.	
114.	Multiplication by 4	
115.	Multiplication by 5.	
116.	Multiplication: Find product without drawings	
117.	Word Problem: (type 1 multiply: ^{eg 3 boxes, each box has 4 balls. How many balls in all?})	
118.	Multiplication in reverse: How many 2's in 6?	
119.	Fractions: naming equal parts.	
120.	Fractions: show fraction of a given number of objects.	

CONTENTS

CONCEPTS (POINTS)	PAGE NUMBER
1. <u>Sums through 18</u>	1
2. <u>Differences through 18</u>	1
3. <u>Fact Families</u>	2
4. <u>Word problem: simple addition and subtraction.</u>	3
5. <u>Three Addends with single digit.</u>	4
6. <u>Place value: write the number n tens and m ones.</u>	6
7. <u>Place value: write the number x hundreds, y tens and m ones. ..</u>	7
8. <u>Given 3 digit number in words, write it in numerals.</u>	9
9. <u>Write a number that comes after a given 3-digit number</u>	10
10. <u>Write a number that comes before a given 3-digit number.</u>	10
11. <u>Skip Counting</u>	12

103	Multiplication: Meaning of product (using drawings)	22
104	Multiplication: Find a product without drawings	22
105	Multiplication: Memorising the sums	22
106	Multiplication by 2	22
107	Multiplication by 3	23
108	Multiplication by 4	23
109	Multiplication by 5	23
110	Multiplication by 1	23
111	Multiplication by 0	23
112	WP Mult.type1: 3 boxes, each box has 4 balls, how many balls	23
113	Multiplication in reverse: How many 2s in 6?	24
114	Fractions: Naming equal parts (halves, etc.)	24
115	Fractions: Show fraction of given no. of objects	24

Concepts of 2nd Grade Mathematics

1 Signs: Recognise the addition sign "+"

Give the answer: $4 + 1 = \underline{\hspace{2cm}}$

2 Signs: Recognise the subtraction sign "-"

Give the answer: $6 - 2 = \underline{\hspace{2cm}}$

3 Terms: Know the meaning of the word "add"

Add 3 and 4: $\underline{\hspace{2cm}}$

4 Signs: Recognise the equal sign "="

a) Circle the sign which means "equal": +, -,], =, <, >.

b) Give the missing sign in each []:

$$8 [] 2 = 10$$

$$8 - 2 [] 6$$

$$12 [] 3 = 15$$

$$8 [] 3 = 5$$

5 Signs: Recognise the "not equal" sign "≠"

a) Circle the sign which means "not equal": +, -, =,], ≠, <, >.

b) Give the missing sign (= or ≠) in each []:

$$8 + 2 [] 10$$

$$8 - 2 [] 6$$

$$12 - 3 [] 15$$

$$8 + 3 [] 5$$

6 Terms: "subtract" and "take away"

Subtract 2 from 7: $\underline{\hspace{2cm}}$

Take away 3 from 9: $\underline{\hspace{2cm}}$

7 Terms: Know the meaning of the word "sum"

Find the sum of 6 and 2: _____

8 Terms: Know the meaning of the word "difference"

Find the difference between 8 and 2: _____

9 Terms: Know the meaning of the word "equal"

Which of the following is correct?

- a) 1 and 2 is more than 3
- b) 1 and 2 is equal to 3
- c) 1 and 2 is less than 3

10 Terms: Know the meaning of "not equal"

Which of the following is correct?

- a) 1 plus 2 is not equal to 3
- b) 1 and 2 is equal to 3
- c) 2 and 2 is not equal to 3

12 Counting items in a figure

How many Stars? _____

★ ★ ★ ★ ★ ★ ★ ★

13 Addition of items counted in figures

p p p p p How many "p"s? _____

t t t t How many "t"s? _____

How many letters? _____

14 Addition: Sums through 9

Find the sum: $2 + 7 =$ _____ . $\begin{array}{r} 4 \\ +3 \\ \hline \end{array}$

15 Subtraction: Differences through 9

Find the difference: $7 - 3 =$ _____ . $\begin{array}{r} 9 \\ -7 \\ \hline \end{array}$

16 Addition of zero

Find the sum: $5 + 0 =$ _____

17 Subtraction of zero

Find the difference: $9 - 0 =$ _____

18 Subtraction of a number from itself

Give the answer: $6 - 6 =$ _____

19 WP (Word problem) Add.type1: Have n, given m, how many

a) Carl has 3 apples and Mary gives him 6 apples. How many apples Carl now?

b) Ahmad has 4 balloons and his brother has 5 balloons. How balloons altogether?

20 WP Subt.type1: Have n, give away m, how many

a) John had 8 marbles and he gave away 5 marbles. How many marbles has now? _____

b) Ahmad had 14 balloons. 5 balloons blew up. How many balloons left?

21 Place value: Ring tens, write answer in tens and units

Ring tens. Write the number.

★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★
★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★
★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★

_____ tens _____ ones

22 Place value: Recognising the tens and the ones digits

What does the underlined digit mean?

83

56

8 tens 8 ones

6 tens 6 ones

23 Place value: Write the number n tens and m ones

Write the number:

7 tens and 6 ones: _____

4 ones and 3 tens: _____

24 Place value: given 2 digit No. in words, write it in numerals

Write using numerals:

Seventy-two: _____

Thirty-six = _____

25 Counting: Write the number that comes after

47, 48, 49, 50, _____

87, 88, _____, _____, _____

26 Counting: Write the number that comes before

_____, 47, 48, 49, 50

_____, _____, 77, 78,

27 Counting: Write the number that comes between

33, 34, 35, __, 37,

46, __, 48, 49, __, 51

28 Counting: Skip count by 2s

0, 2, 4, __, __, __

29 Counting: Skip count by 3s

0, 3, 6, __, __, __

30 Counting: Skip count by 5s

0, 5, 10, __, __, __

31 Counting: Skip count by 10s

0, 10, __, __, __

32 Numbers: Recognise even numbers

Circle the even numbers: 5, 3, 2, 8, 22, 12, 13, 14, 15, 77, 86

33 Numbers: Recognise odd numbers

Circle the odd numbers: 5, 4, 7, 18, 21, 12, 15, 54, 50, 77, 100

Count in odd numbers: 1, 3, 5, __, __, __, __

34 Signs: Recognise the symbol of "greater than": >

Put the correct symbol > in the correct space [] :

5 [] 7

15 + 2 [] 9

5 + 2 [] 7

35 Signs: Recognise the symbol of "less than": $<$

Put the correct symbol in the space [] :

$$5 + 3 \{ \quad \} 9$$

81 [] 78

36 Comparing two-digit numbers: use <, = or >

5 + 13 [1 9

81 [] 98

37 Comparing: Give position: First, second, etc.

The 'letters' A, B, C, D and E are racing:

Start: D A C E B : Finish

Which letter is first? _____

Which letter is second?

Which letter is third? _____

What is the position of the D? _____

Which letter is fourth?

Which letter is last?

38 Addition: Sums through 18

Find the sum: $6 + 7 =$ _____.

$$\begin{array}{r} 8 \\ + 9 \\ \hline \end{array}$$

39 Addition of 9: Add 10, take away 1

We can add 9 to a number by first adding ten and then taking away 1:

Example:

Give the answer: $15 + 9$

Step 1: $15 + 10 = 25$

Step 2: $25 - 1 = 24$

Step 3: So, $15 + 9 = 24$

Exercise:

1. $15 + 9 =$ _____

2. $23 + 9 =$ _____

40 Subtraction: Differences through 18

Find the difference: $15 - 9 =$ _____.

$$\begin{array}{r} 16 \\ -7 \\ \hline \end{array}$$

41 Addition/Subtraction: Fact families

The three numbers 4, 5, and 9 form a fact family because we can write four facts about them:

1. $4 + 5 = 9$

2. $5 + 4 = 9$

3. $9 - 4 = 5$

4. $9 - 5 = 4$

Write four facts about these three numbers: 8, 13, 5.

1. _____

2. _____

3. _____

4. _____

42 Addition: adding 3 numbers

Find the sum: $4 + 2 + 1 =$ _____

43 WP Subt.type2: Ali has 3, Betty has 4, how many more has Betty

a) John has 15 marbles and Ali has 7 marbles . How many more marbles has John? _____

b) Ahmad won 14 games and Sammy won 12 games. Who won more games? How many more? _____, _____

44 WP Subt.type3: Ali has 3, Betty has 4, how many less has Ali

a) James has 15 toy cars and Ali has 8 toy cars . How many fewer cars does Ali have? _____

b) Ahmad won 9 games and Sammy won 12 games. Who won fewer games? How many less? _____, _____

45 Time: Tell time in 5-minute intervals

Draw a watch that reads

a) 10 minutes after 8:

b) 45 minutes after 6:

c) 5 minutes before 12:

46 Time: written in hrs and minutes (e.g. 7:35)

Draw a watch which reads '5:25'

Draw a watch which reads '4:05'

Draw a watch which reads '7:35'

47 Time: time elapsed in hours

1. Draw a watch which reads '5:25'. Draw the same watch 1 hour later.
2. Sami's father left his house at 8 o'clock in the morning and returned at 12 o'clock noon. How many hours did Sami's father stay away?
3. Draw a clock that reads 9 o'clock in the morning. Draw a clock that reads 3 o'clock in the afternoon. How many hours between?

48 Months of the year: order

What month comes

a) after January? _____

b) before September? _____

49 Addition: 1-digit to 2-digit numbers, no trading

Add:

$$52 + 7 = \underline{\hspace{2cm}} \quad \begin{array}{r} 81 \\ + 6 \\ \hline \end{array}$$

50 Addition: 2-digit to 2-digit numbers, no trading

Add:

$$52 + 27 = \underline{\hspace{2cm}} \quad \begin{array}{r} 15 \\ + 83 \\ \hline \end{array}$$

51 Addition: 1-digit to 2-digit numbers, with trading

Add:

$$5 + 79 = \underline{\hspace{2cm}} \quad \begin{array}{r} 46 \\ + 7 \\ \hline \end{array}$$

52 Addition: 2-digit to 2-digit numbers, with trading

Add:

$$55 + 27 = \underline{\hspace{2cm}} \quad \begin{array}{r} 15 \\ + 88 \\ \hline \end{array}$$

53 Addition: three 2-digit numbers, with trading

Add:

$$\begin{array}{r} 51 + 28 = \underline{\hspace{2cm}} \\ \begin{array}{r} 25 \\ +82 \\ \hline \end{array} \end{array}$$

54 WP Add.type1, using 2-digit nos.

a) Joan has 13 ribbons, and Mary gives her 18 more. How many ribbons will Joan have? _____

b) Ahmad has 24 balloons, his sister has 3 balloons and his brother has 8 balloons. How many balloons altogether? _____

55 WP Add.type2: Ali has 3, Bob has 4 MORE, how many has Bob

Joan has 13 ribbons, and Mary has 7 more ribbons than Joan. How many ribbons does Mary have _____

56 WP Add.type3: Ali has 6, which is 4 LESS than Bob, how many has Bob

Ahmad weighs 41 kilos. He weighs 8 kilos less than his older brother. How much does his older brother weigh?

57 WP Add.type4: If six birds die we'll have 9 left. How many

a) Joan lost 13 beads, and now she has only 8 beads left. How many beads did she have before?

b) Ahmad invited all his classmates to his birthday party. 16 students came and 9 did not come. How many classmates does Ahmad have? How many STUDENTS altogether are in Ahmad's class?

58 Patterns: Recognise a pattern in a series of numbers

Complete the following:

a) 1, 5, 9, 13, 17, __, __, __, __

b) 1, 2, 4, 5, 7, 8, 10, 11, __, __, __, __, __

59 Shapes: square, rectangle, circle, triangle

Draw the following shapes:

Square:

Rectangle:

Circle:

Triangle:

60 Shapes: sphere, cylinder, cube, cone

Draw the following shapes:

Cube:

Cylinder:

Sphere:

Cone:

61 Shapes: Find no. of sides and corners in given figure

Draw a figure with six sides. How many corners does it have?

62 Shapes: Symmetry: Draw figure with "matching parts"

Draw a square: Draw a line through it to cut it into two matching parts.

Draw a "heart": Draw a line through it to cut it into two matching parts.

63 Graph: Reading a bar graph

The graph shows the laps some of the children swam at a swimming gala. The vertical line at the end helps you see that Julie swam 14 laps:

- Who swam 15 laps? _____
- Who swam 10 laps? _____
- Who swam most laps? _____
- Who swam fewer laps than Mariam but more laps than Julie? _____

64 Graph: Draw a graph using tally marks

Use the data below to draw a graph using tally marks:
Listed below are the number of cookies each child ate:

- | | | | |
|----------|---------|-----------|---------|
| Hanna: 5 | Hani: 7 | Nadine: 2 | Mona: 3 |
|----------|---------|-----------|---------|

65 Picture Graphs: Each symbol representing many items

This is the result of asking second grade students what they eat at noon

Eat hot lunch	:	*	*	*	*	*	*	*											
Eat sandwiches	:	*	*	*	*	*	*	*	*	*	*	*	*	*	*	*	*	*	*
Eat chips	:	*	*	*	*														
Eat nothing	:	*																	

Each '*' means 10 people.

- a) How many people eat chips? _____
- b) How many people do NOT eat hot lunch? _____
- c) How many more students eat sandwiches than hot lunch? _____
- d) How many less people eat chips than hot lunch? _____

66 Subtraction: 2-digit numbers, no trading

Find the difference:	79	87	64
	<u>-26</u>	<u>- 5</u>	<u>-10</u>

$$65 - 51 = \underline{\hspace{2cm}}$$

$$89 - 13 = \underline{\hspace{2cm}}$$

67 Subtraction: 2-digit numbers, trading tens

Find the difference:	76	83	60
	<u>-29</u>	<u>- 5</u>	<u>-14</u>

$$65 - 56 = \underline{\hspace{2cm}}$$

$$80 - 13 = \underline{\hspace{2cm}}$$

68 Subtraction: Check the result of subtraction by addition

Subtract $12 - 3 = \underline{\hspace{2cm}}$

Check the result by addition: $\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

69 Tables: Reading price from a table

This table gives the prices of certain items sold in a shop:

<u>ITEM</u>	<u>PRICE in Dirhams</u>
Pencil	1
Copybook	4
Pencil case	3
School bag	53
Eraser	2

- a) Which item costs 3 Dirhams? _____
- b) Which item is the cheapest? _____
- c) Which item costs more than a pencil case but less than a school bag?

70 Addition: Find price of n similar items by addition

One book costs 13 Dirhams

How much do three books cost? _____

How much do five books cost? _____

71 Measurement: Measure length using "paperclip" ruler

Make a ruler calibrated in paperclips. About how many paperclips is the length of your pencil?

72 Measurement: length using cm ruler

About how many cm is the length of your pencil? _____

3 Measurement: Estimate length to the nearest cm

About how long is your shoe?

74 Place value: Write 3-digit number given figure

Write the number:

3 squares each of 100 pieces, 9 sticks each of ten pieces, and 5 ones:

75 Place value: Given 3 digit number in words, write in numerals

Write the number:

Two hundred forty-six: _____ Four hundred and seven: _____

76 Place value: Write the number: x hundreds n tens and m ones

Write the number:

2 hundreds, 9 tens and 5 ones: _____

5 ones, 4 hundreds and 8 tens: _____

77 Counting: Write number that comes after given 3-digit number

What number comes AFTER 472? _____

78 Counting: Write number that comes before given 3-digit number

What number comes BEFORE 472? _____

79 Place value: value of each digit from units to 100s place

What is the value of 8 in each of these numbers?

892 _____

785 _____

208 _____

80 Measurement: Measure the perimeter of a rectangle

Perimeter means distance around. Find the perimeter of the figure:

81 Addition: adding 10 to a number

Give the number 10 more than 426: _____

82 Subtraction: take away 10 from a number

Give the number 10 less than 426: _____

83 Addition: adding 100 to a number

Give the number 100 more than 426: _____

84 Subtraction: take away 100 from a number

Give the number 100 less than 426: _____

85 Addition: 3-digits, no trading

Add:

$$205 + 73 = \underline{\hspace{2cm}}$$

$$46 + 822 = \underline{\hspace{2cm}}$$

86 Subtraction: 3-digits, no trading

Take away:

$$785 - 62 = \underline{\hspace{2cm}}$$

$$646 - 215 = \underline{\hspace{2cm}}$$

87 Comparing: Smaller, smallest, bigger, biggest, shorter etc.

Look at the three lines, A, B and C:

_____ A _____ B _____ C

Which is shorter, A or C? _____

Which is the longest? _____

Which is longer, A or B? _____

Which is the shortest? _____

88 Comparing numbers up to hundreds

Write '<' (less than) or '>' (more than) in each []

29 [] 21

375 [] 355

762 [] 758

89 Addition: 3-digit to 2-digit numbers, trading once

Add:

$$205 + 79 = \underline{\hspace{2cm}}$$

$$42 + 897 = \underline{\hspace{2cm}}$$

90 Addition: 3-digit to 3-digit numbers, trading once

Add:

$$585 + 407 = \underline{\hspace{2cm}}$$

$$435 + 482 = \underline{\hspace{2cm}}$$

91 Addition: Column addition

$$\begin{array}{r} 27 \\ 8 \\ + 36 \\ \hline \end{array}$$

$$\begin{array}{r} 354 \\ 286 \\ + 75 \\ \hline \end{array}$$

$$\begin{array}{r} 589 \\ 314 \\ 216 \\ + 176 \\ \hline \end{array}$$

93 WP Add.type1, using 3-digit nos.

a) Joan has 113 shells, and Mary gives her 88 more. How many shells will Joan have?

b) Ahmad put 24 carrots in a bag. His sister put 13 carrots in the same bag, and his brother put 42 more. How many carrots in the bag altogether?

94 WP Add.type2, using 3-digit nos.

A school had 312 students last year, and this year it has 72 more than last year. How many students does the school have this year?

95 WP Add.type3, using 3-digit nos.

Ahmad weighs 410 dirhams, but he has less than his sister by 91 Dirhams. How much money does his sister have?

96 WP Add.type4, using 3-digit nos.

a) James bought a toy car for 135 Dirhams, and now he has only 86 Dirhams left. How many Dirhams did he have before?

b) Ahmad invited all his classmates to his birthday party. They ate 120 pieces of cake, and 55 pieces of cake were left. How many pieces of cake did he have at the beginning?

97 Subtraction: 3-digit numbers, trading hundreds

$$868 - 87 = \underline{\hspace{2cm}}$$

$$408 - 27 =$$

98 Subtraction: 3-digit numbers, two trades

$$864 - 187 =$$

$$408 - 79 =$$

99 WP Subt.type2, using 3-digit nos.

100 WP Subt.type3, using 3-digit nos.

101 Multiplication: find sum by repeated addition

★ ★ ★ ★

Two fours are how many? _____

★ ★ ★ ★

102 Multiplication: Meaning of product (using drawings)

Five twos = _____

$5 \times 2 =$ _____

three fives = _____

$3 \times 5 =$ _____

103 Multiplication: Meaning of product (using drawings)

0 0 0 0 0 0 0 0
Four twos equal 8. We write: $4 \times 2 = 8$

Complete the following:

0 0 0 0 0 0

Three twos = _____. We write: ____ \times ____ = ____

Two fours = _____. We write: ____ \times ____ = ____

Four threes = _____. We write: ____ \times ____ = ____

Two fives = _____. We write: ____ \times ____ = ____

104 Multiplication: Find a product without drawings

$4 \times 5 =$ _____

$$\begin{array}{r} 3 \\ \times 2 \\ \hline \end{array}$$

105 Multiplication: Memorising the sums

We multiply when we add the same number to itself many times. We find the answer by addition, but we must memorise the answer of multiplication. The sums we memorise are called the multiplication tables

e.g. We must remember that $2 \times 2 = 4$, that $4 \times 3 = 12$, and so on

106 Multiplication by 2

Complete the following:

$4 \times 2 =$ _____

$3 \times 2 =$ _____

$5 \times 2 =$ _____

107 Multiplication by 3

Complete the following:

$5 \times 3 = \underline{\quad}$

$4 \times 3 = \underline{\quad}$

$3 \times 3 = \underline{\quad}$

108 Multiplication by 4

Complete the following:

$5 \times 4 = \underline{\quad}$

$4 \times 4 = \underline{\quad}$

$2 \times 4 = \underline{\quad}$

109 Multiplication by 5

Complete the following:

$4 \times 5 = \underline{\quad}$

$3 \times 5 = \underline{\quad}$

$5 \times 5 = \underline{\quad}$

110 Multiplication by 1

A number multiplied by one does not change, because it is the number taken once only:

$1 \times 5 = \underline{\quad}$

$8 \times 1 = \underline{\quad}$

$1 \times 1 = \underline{\quad}$

111 Multiplication by 0

A number multiplied by zero is always zero, because it is the number taken zero times (that is, no times at all):

$0 \times 4 = \underline{\quad}$

$7 \times 0 = \underline{\quad}$

$1 \times 0 = \underline{\quad}$

112 WP Mult.type1: 3 boxes, each box has 4 balls, how many balls

a) James has 15 toy cars and Ali has 8 toy cars. How many fewer cars does Ali have?

b) Ahmad won 9 games and Sammy won 12 games. Who won fewer games? How many less? ,

113 Multiplication in reverse: How many 2s in 6?

- a) How many 2s are there in 8? _____
- b) How many 3s in 9? _____

114 Fractions: Naming equal parts (halves, etc.)

- a) A square is divided into two EQUAL parts. What is each part called?

- b) Draw a circle. Divide it into 4 equal parts. What is each part called? _____
- c) Below is a line divided into three parts. Is each part called a third? Why not?
-----|-----|-----|

What is the big part of the line called (measure it)? _____

What is each of the smaller parts of the line called? _____

115 Fractions: Show fraction of given no. of objects

For each group of 8 stars, circle the fraction written under them.

★ ★ ★ ★ ★ ★ ★ ★	★ ★ ★ ★ ★ ★ ★ ★	★ ★ ★ ★ ★ ★ ★ ★	★ ★ ★ ★ ★ ★ ★ ★

159	Multiplic.: Money by 2-d numbers	34
160	Div.: 3-d Mult-of-10 by 2-d mult-of-10	34
161	Div.: 3-d No. by 2-d multiple of 10	34
162	Div. by 2-d: 1-d quotient and remainder	34
163	Div. by 2-d: 2-d quotient & remainder	35
164	Decimals: Tenths: Fractions of 10 (e.g. 0.6)	35
165	Decimals: Whole numbers & tenths (e.g. 3.6)	35
166	Decimals: Hundredths: Fractions of 100 (e.g. 0.26)	36
167	Decimals: Whole numbers & hundredths (e.g. 3.46)	36
168	Comparing decimals using =, < and >	36
169	Decimals: Adding and subtracting	37

Basic Concepts of 4th Grade Maths

1 Addition: Sums through 18

Find the sum: $6 + 7 =$ _____.

$$\begin{array}{r} 8 \\ +9 \\ \hline \end{array}$$

2 Subtraction: Differences through 18

Find the difference: $15 - 9 =$ _____.

$$\begin{array}{r} 16 \\ -7 \\ \hline \end{array}$$

3 Pl.V(Place value): Write the number n tens and m ones

Write the number:

7 tens and 6 ones: _____

4 ones and 3 tens: _____

4 Pl.V: Write the number x hundreds n tens and m ones

Write the number:

2 hundreds, 9 tens and 5 ones: _____

5 ones, 4 hundreds and 8 tens: _____

5 Add.: 2-digit (2-d) to 2-d numbers, trading tens

Find the sum: $6 + 7 =$ _____.

$$\begin{array}{r} 8 \\ +9 \\ \hline \end{array}$$

Add:

$52 + 7 =$ _____

$6 + 81 =$ _____

$52 + 27 =$ _____

$15 + 83 =$ _____

$5 + 79 =$ _____

$46 + 7 =$ _____

$55 + 27 =$ _____

$15 + 88 =$ _____

6 Subt.: 2-d numbers, trading tens

Find the difference:

$15 - 9 = \underline{\hspace{2cm}}$

$$\begin{array}{r} 16 \\ -7 \\ \hline \end{array}$$

$$\begin{array}{r} 76 \\ -29 \\ \hline \end{array}$$

$$\begin{array}{r} 83 \\ -5 \\ \hline \end{array}$$

$$\begin{array}{r} 60 \\ -14 \\ \hline \end{array}$$

$65 - 56 = \underline{\hspace{2cm}}$

$80 - 13 = \underline{\hspace{2cm}}$

7 Add.: 3-d to 3-d numbers, trading hundreds

Add:

$205 + 79 = \underline{\hspace{2cm}}$

$46 + 897 = \underline{\hspace{2cm}}$

$585 + 427 = \underline{\hspace{2cm}}$

$915 + 808 = \underline{\hspace{2cm}}$

8 Subt.: 3-d numbers, two trades

Find the difference:

$$\begin{array}{r} 706 \\ -213 \\ \hline \end{array}$$

$$\begin{array}{r} 838 \\ -55 \\ \hline \end{array}$$

$$\begin{array}{r} 664 \\ -184 \\ \hline \end{array}$$

$$\begin{array}{r} 701 \\ -213 \\ \hline \end{array}$$

$$\begin{array}{r} 832 \\ -55 \\ \hline \end{array}$$

$$\begin{array}{r} 643 \\ -184 \\ \hline \end{array}$$

$864 - 187 = \underline{\hspace{2cm}}$

$408 - 79 = \underline{\hspace{2cm}}$

9 Subt.: 3-d numbers across middle zero

$$\begin{array}{r} \text{Find the difference: } 702 \\ -213 \\ \hline \end{array}$$

$$\begin{array}{r} 803 \\ -55 \\ \hline \end{array}$$

$$\begin{array}{r} 600 \\ -184 \\ \hline \end{array}$$

$806 - 387 = \underline{\hspace{2cm}}$

$405 - 79 = \underline{\hspace{2cm}}$

10 Add.: Three addends

$623 + 482 + 198 = \underline{\hspace{2cm}}$

11 Graph: Reading a (bar) graph

The graph shows some of the laps children swam at a swimming gala. The vertical line at the end helps you see that Julie swam 14 laps:

Who swam 15 laps? _____

Who swam 10 laps? _____

Who swam most laps? _____

Who swam fewer laps than Mariam but more laps than Julie?

12 Add./subt. fact families

The three numbers 4, 5, and 9 form a 'fact family' because we can write four facts about them:

1. $4 + 5 = 9$

2. $5 + 4 = 9$

3. $9 - 4 = 5$

4. $9 - 5 = 4$

Exercise:

1. Write four facts about these three numbers: 8, 13, 5.

1. _____

2. _____

3. _____

4. _____

2. Complete the following to make each true:

a) $5 + 8 =$ _____

b) $6 +$ _____ $= 13$

c) $12 +$ _____ $= 17$

d) _____ $+ 8 = 18$

e) _____ $- 5 = 17$

f) $15 -$ _____ $= 8$

13 WP Simple add. and subt.

1. Class 4B has 27 children. Class 4C has 26 children. How many children in both classes?

2. Class 2A has 26 students. 14 of them are boys. How many girls in 2A?

14 WP Add./subt.comparison: Find the difference

1. Jane has 8 sweets Ali has 6 sweets. Who has more sweets? How many more?

Jane has: | 8 sweets |

Ali has: | 6 sweets |

_____ : The difference

Who has more sweets? _____

How much more? (what is the difference?) _____

2. Jane has 38 sweets. Ali has 9 sweets. Who has fewer sweets? How many fewer?

15 WP Add./subt.comparison: Given the difference

1. Jane has 55 stamps. Ali has 41 stamps more than Jane. How many stamps has Ali?

Jane has: | 55 stamps |

-----> 41 more

Ali has: | (?) |

Ali has: _____

2. Betty has 17 pens, which is 4 more than Ali has. How many has Ali?

3. Jane has 52 sweets. Jane has 16 sweets LESS than Ali. How many sweets has Ali?

Jane has: | 52 sweets |

-----16-----! the difference

Ali has: | (?) |

Ali has: _____

4. Jane has 15 shells now, 4 more than she has yesterday. How many shells did she have yesterday?

Jane had: _____

16 WP Add./subt.: Several steps

1. Carl bought an icecream cone for three Dirhams, then he bought a set of coloured pencils for 15 Dirhams. He had 23 Dirhams left. How much money did he have before?

2. A bus left Wanta Village with 23 passengers on board. When it stopped at the first station, 3 passengers got off and 7 got on. At the second station 4 got off and 1 got on. Its last stop was Gloria Town. How many passengers got off in Gloria Town?

17 Pl.V: Write the number x 1000s, y 100s, n 10s & m ones

Write the number:

2 thousands, 4 hundreds, 7 tens and 6 ones: _____

5 ones, 4 hundreds, 8 tens and 3 thousands: _____

The probability of sex of second child (Ind.Evt)

18 Pl.V: units to 1000s place

What is the value of 8 in each of these numbers?

3,892 _____

7,785 _____

4,208 _____

8,340 _____

19 Pl.V: Given number in words, write in numerals

Write the number:

Two hundred forty six: _____

four hundred and s

Four thousand, two hundred and three: _____

Five hundred and three thousand, four hundred and seventy eight

20 Count.: Skip count by 10s, 100s, 1000s

1. 0, 10, ____, ____, ____

2. 140, 130, 120, ____, ____, ____

3. 123, 223, 323, ____, ____

4. 5213, 5113, ____, ____, ____

5. 9173, 10173, 11173, ____, ____

6. 85345, 84345, 83345, ____, ____

21 Round to the nearest ten

48 _____

55 _____

93 _____

472 _____

22 Round to the nearest hundred

482 _____

1555 _____

938 _____

450 _____

23 Round to the nearest thousand

18482 _____

17555 _____

4938 _____

850 _____

24 Money: Dirhams and fils

1. How many fils make 1 dirham? _____
2. How many fils are Dh2? _____
3. 300 fils are how many dirhams? _____
4. Write 243 fils in dirhams and fils (with a point '.') _____

25 Money: Dollars and cents

1. How many cents make 1 dollar? _____
2. How many cents are \$2? _____
3. 300 cents are how many dollars? _____
4. Write 243 cents in dollars and cents (with a point '.') _____

26 Round to the nearest ten dollar

\$873 _____

\$566 _____

\$2655 _____

27 Round to the nearest dollar

\$8.45 _____

\$5.55 _____

\$6.50 _____

28 Pl.V: Given No.in words, write in numerals: millions

Write the numbers:

Two hundred forty six thousand, three hundred fifty one: _____

Forty million, hundred seventy three thousand and three: _____

29 Pl.V: millions PERIOD

1. What is the value of 8 in each of these numbers?

8,392,435 _____

785,479,132 _____

2. Which digits are in the millions period in 143,256,897? _____

30 Pl.V: thousands period

Which digits are in the thousands period in 143,256,897? _____

31 Pl.V: ones period

Which digits are in the ones period in each of:

8,392,435 _____ 785,479,132 _____

32 WP Order: Draw and find the order

Carl is younger than Mary. Roger is older than mary. David's age is between Mary's and Roger's. Who is the youngest?

33 Comparing numbers using =, < and >

Write < (less than) or > (more than) in each [_]

29 [_] 21

375 [_] 355

8,762 [_] 8,758

34 Comparing 5-d numbers using =, < and >

Write < (less than) or > (more than) in each [_]

82,829 [_] 82,856

10,375 [_] 10371

98,762 [_] 89,798

35 Add.: dollars and cents to dollars and cents

$$\$4.79 + \$2.48 = \underline{\hspace{2cm}} \qquad \$9.87 + \$4.56 = \underline{\hspace{2cm}}$$

$$\$4.69 + \$0.41 = \underline{\hspace{2cm}} \qquad \$9.76 + \$0.05 = \underline{\hspace{2cm}}$$

36 Subt.: Dollars and cents from dollars and cents

$$\$4.79 - \$2.48 = \underline{\hspace{2cm}} \qquad \$9.00 - \$4.56 = \underline{\hspace{2cm}}$$

$$\$4.69 - \$0.81 = \underline{\hspace{2cm}} \qquad \$9.06 - \$0.07 = \underline{\hspace{2cm}}$$

37 Estim.: Round to nearest 10 then ADD

Estimate to the nearest 10:

$$37 + 54 = \underline{\hspace{2cm}} \qquad 175 + 418 = \underline{\hspace{2cm}}$$

38 Estim.: Round to nearest 100 then ADD

Estimate to the nearest 100:

$$372 + 546 = \underline{\hspace{2cm}} \qquad 3713 + 2180 = \underline{\hspace{2cm}}$$

39 Estim.: Round to nearest dollar then ADD

Estimate to the nearest dollar:

$$\$3.75 + 8.55 = \underline{\hspace{2cm}} \qquad \$7.35 + 1.80 = \underline{\hspace{2cm}}$$

40 Estim.: Round to nearest 1000 then ADD

Estimate to the nearest 1000:

$$3502 + 5469 = \underline{\hspace{2cm}} \qquad 17500 + 21802 = \underline{\hspace{2cm}}$$

41 Add.: Column addition

27	354	589
8	286	314
<u>+36</u>	<u>+ 75</u>	<u>216</u>
		<u>+176</u>

42 Add.: Large numbers

$$\begin{array}{r} 4,792,145 \\ +2,487,082 \\ \hline \end{array}$$

43 Add.: several numbers in horizontal format

$$26 + 7 + 35 = \underline{\hspace{2cm}}$$

$$6263 + 418 + 4085 + 15 = \underline{\hspace{2cm}}$$

44 Estim.: Round to nearest 10 then SUBTRACT

Estimate to the nearest 10:

$$54 - 37 = \underline{\hspace{2cm}}$$

$$418 - 175 = \underline{\hspace{2cm}}$$

45 Estim.: Round to nearest 100 then SUBTRACT

Estimate to the nearest 100:

$$372 - 146 = \underline{\hspace{2cm}}$$

$$3713 - 2180 = \underline{\hspace{2cm}}$$

46 Estim.: Round to nearest dollar then SUBTRACT

Estimate to the nearest dollar:

$$\$3.75 - 2.55 = \underline{\hspace{2cm}}$$

$$\$7.30 - 1.85 = \underline{\hspace{2cm}}$$

47 Estim.: Round to nearest 1000 then SUBTRACT

Estimate to the nearest 1000:

$$7505 - 5449 = \underline{\hspace{2cm}}$$

$$37500 - 21602 = \underline{\hspace{2cm}}$$

$$\begin{array}{r} 4,792,145 \\ -2,487,082 \\ \hline \end{array}$$

49 Subt.: Dollars and cents across middle zero

Find the difference: $\begin{array}{r} \$7.01 \\ -2.13 \\ \hline \end{array}$ $\begin{array}{r} \$8.00 \\ -5.15 \\ \hline \end{array}$ $\begin{array}{r} \$9.03 \\ -1.54 \\ \hline \end{array}$

$$\$8.07 - \$3.85 =$$

$$\$14.08 - \$10.69 =$$

50 Table, 2 columns: Listing one property of objects

This table gives the prices of certain items sold in a shop:

<u>ITEM</u>	<u>PRICE in Dirhams</u>
Pencil	1
Copybook	4.50
Pencil case	3.25
School bag	53
Eraser	2.5

1. Which item costs 3.25 Dirhams? _____
2. Which item is the cheapest? _____
3. Which item costs more than a pencil case but less than a school bag? _____
4. How much is an eraser cheaper than a pencil case? _____

First book: _____
 . -----\$3----- the difference
 Second book: _____

Two fives = _____. We write: _____ x _____ = _____

$5 \times 3 =$ _____ $8 \times 3 =$ _____ $7 \times 3 =$ _____

55 Multiplic. by 4 (mental maths)

Complete the following:

$6 \times 4 = \underline{\quad}$

$7 \times 4 = \underline{\quad}$

$9 \times 4 = \underline{\quad}$

56 Multiplic. by 5 (mental maths)

Complete the following:

$5 \times 5 = \underline{\quad}$

$8 \times 5 = \underline{\quad}$

$7 \times 5 = \underline{\quad}$

57 Multiplic. by 6 (mental maths)

Complete the following:

$6 \times 6 = \underline{\quad}$

$8 \times 6 = \underline{\quad}$

$9 \times 6 = \underline{\quad}$

58 Multiplic. by 7 (mental maths)

Complete the following:

$7 \times 4 = \underline{\quad}$

$8 \times 7 = \underline{\quad}$

$9 \times 7 = \underline{\quad}$

59 Multiplic. by 8 (mental maths)

Complete the following:

$8 \times 8 = \underline{\quad}$

$6 \times 8 = \underline{\quad}$

$9 \times 8 = \underline{\quad}$

60 Multiplic. by 9 (mental maths)

Complete the following:

$8 \times 9 = \underline{\quad}$

$7 \times 9 = \underline{\quad}$

$9 \times 9 = \underline{\quad}$

61 Multiplic. by 0 (mental maths)

Complete the following:

$5 \times 0 = \underline{\quad}$

$8 \times 0 = \underline{\quad}$

$0 \times 7 = \underline{\quad}$

62 Multiplic. by 1 (mental maths)

Complete the following:

$1 \times 6 = \underline{\hspace{2cm}}$

$8 \times 1 = \underline{\hspace{2cm}}$

$9 \times 1 = \underline{\hspace{2cm}}$

63 Multiplic. is commutative (examples) (mental maths)

Complete the following:

$7 \times \underline{\hspace{1cm}} = 4 \times 7$

$8 \times \underline{\hspace{1cm}} = \underline{\hspace{1cm}} \times 3$

$\underline{\hspace{1cm}} \times 7 = 9 \times \underline{\hspace{1cm}}$

64 Multiplic.: Find missing factor (6 x = 48) (mental maths)

Find the missing factor:

$8 \times \underline{\hspace{1cm}} = 40$

$6 \times \underline{\hspace{1cm}} = 54$

$9 \times \underline{\hspace{1cm}} = 63$

65 WP multiplic. 1 step: 5 boxes, 4 balls/box

1. We have 5 boxes. Each box has six pens. How many pens in all?

2. To make an ice-cream soda you need to pour one bottle of 7-Up o
scoops of ice-cream. How many scoups of ice-cream do you need to
4 ice-cream sodas?

66 Multiples: Give multiples of given number (mental maths)

Give the multiples of:

8 : _____, _____, _____, _____, _____, _____, _____, _____

3 : _____, _____, _____, _____, _____, _____, _____, _____

9 : _____, _____, _____, _____, _____, _____, _____, _____

67 Numbers: Recognise even numbers

Circle the even numbers: 5, 3, 2, 8, 22, 12, 13, 14, 15, 77, 86

68 Numbers: Recognise odd numbers

Circle the odd numbers: 5, 4, 7, 18, 21, 12, 15, 54, 50, 77, 100

Count in odd numbers: 1, 3, 5, __, __, __, __,

69 Factors: Give missing factor of given number (mental maths)

Give the missing factor:

a) $5 \times \underline{\quad} = 40$

b) $7 \times \underline{\quad} = 63$

c) $12 \times \underline{\quad} = 0$

d) $\underline{\quad} \times 8 = 8$

e) $\underline{\quad} \times 5 = 35$

f) $15 \times \underline{\quad} = 30$

70 WP make a list of possible combinations

1. Mary can chose one drink and one fruit. How many differrent choices does mary have? Make a list.

Drinks: Milk; cola; juice

Fruit: Apple; pear

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

71 Flow Chart: symbol of START, STOP, INSTRUCTION, QUESTION

What symbol is used for each of START, STOP, INSTRUCTION, QUESTION?

1. _____

2. _____

3. _____

4. _____

72 Sets: Find object inside circle AND square

Draw a circle and a square such that:

'A' is inside the circle and the square.

'B' is inside the circle only.

'C' is inside the square only.

73 Factors: Give ALL factors of given number

Give ALL the factors of:

8 : _____, _____, _____, _____, _____, _____, _____, _____,

9 : _____, _____, _____, _____, _____, _____, _____, _____,

12: _____, _____, _____, _____, _____, _____, _____, _____,

74 Div.: How many twos are in 8? We write: $8 - 2 = 4$

0 0 0 0 0 0 0 0

We find four twos in 8. We write: $8 - 2 = 4$

Complete the following:

0 0 0 0 0 0

How many threes are in 6? = _____. We write: $6 - 3 =$ ____

How many fours are in 8? = _____. We write: ____ - ____ = ____

How many threes are in 12? = _____. We write: ____ - ____ = ____

How many fives are in 20? = _____. We write: ____ - ____ = ____

75 Div. by 2 (mental maths)

Complete the following:

$8 - 2 =$ _____

$14 - 2 =$ _____

$18 - 2 =$ _____

76 Div. by 3 (mental maths)

Complete the following:

$15 - 3 = \underline{\quad}$

$24 - 3 = \underline{\quad}$

$21 - 3 = \underline{\quad}$

77 Div. by 4 (mental maths)

Complete the following:

$24 - 4 = \underline{\quad}$

$28 - 4 = \underline{\quad}$

$36 - 4 = \underline{\quad}$

78 Div. by 5 (mental maths)

Complete the following:

$25 - 5 = \underline{\quad}$

$35 - 5 = \underline{\quad}$

$45 - 5 = \underline{\quad}$

79 Div. by 6 (mental maths)

Complete the following:

$36 - 6 = \underline{\quad}$

$48 - 6 = \underline{\quad}$

$54 - 6 = \underline{\quad}$

80 Div. by 7 (mental maths)

Complete the following:

$28 - 7 = \underline{\quad}$

$56 - 7 = \underline{\quad}$

$63 - 7 = \underline{\quad}$

81 Div. by 8 (mental maths)

Complete the following:

$64 - 8 = \underline{\quad}$

$56 - 8 = \underline{\quad}$

$72 - 8 = \underline{\quad}$

82 Div. by 9 (mental maths)

Complete the following:

$72 - 9 = \underline{\quad}$

$63 - 9 = \underline{\quad}$

$81 - 9 = \underline{\quad}$

83 Div.: dividing zero by any number (mental maths)

Complete the following:

$0 - 8 = \underline{\quad}$

$0 - 3 = \underline{\quad}$

$0 - 17 = \underline{\quad}$

84 Div. by 1 (mental maths)

Complete the following:

$6 - 1 = \underline{\quad}$

$8 - 1 = \underline{\quad}$

$9 - 1 = \underline{\quad}$

85 Div. is NOT commutative (examples)

True or false?

$7 - 4 \text{ ?}=? \quad 4 - 7$

$8 - 2 \text{ ?}=? \quad 2 - 8$

$6 - 6 \text{ ?}=? \quad 6 - 6$

86 Div.: Find missing factor ($48 - \quad = 6$) (mental maths)

Complete the following:

$40 - \underline{\quad} = 8$

$54 - \underline{\quad} = 6$

$63 - \underline{\quad} = 9$

87 Div. by 1-d: 1-d quotient and remainder

. Complete the following, showing quotients and remainders:

$5 \overline{)23}$

$6 \overline{)27}$

$9 \overline{)44}$

88 Multiplic./div. fact families

The three numbers 4, 7, and 28 form a 'fact family' because we can write four facts about them. For example, if 4 (first factor) is multiplied by 7 (second factor), the product is 28. The four facts built around these three numbers are:

$$4 \times 7 = 28$$

$$7 \times 4 = 28$$

$$28 - 4 = 7$$

$$28 - 7 = 4$$

Exercise:

1. Write four facts about these three numbers: 8, 7, 56.

1. _____

2. _____

3. _____

4. _____

2. Complete the following to make each true:

a) $5 \times 8 = \underline{\hspace{2cm}}$

b) $64 [\] 8 = 8$

c) $12 \times \underline{\hspace{2cm}} = 60$

d) $\underline{\hspace{2cm}} \times 8 = 72$

e) $45 [\] 5 = \underline{\hspace{2cm}}$

f) $15 \times \underline{\hspace{2cm}} = 45$

g) $9 \times 4 = \underline{\hspace{2cm}}$

h) $120 [\] 10 = 12$

Two types of word problems can be constructed around four facts of multiplication/division:

1. Multiplication: Two factors are given, find their sum: $7 \times 4 = ?$

2. Division: The product and one factor are given, find the other factor:
 $28 / 7 = ???$

The student should decide whether the 'given' fits the 1st or the 2nd type by answering these questions:

Are we GIVEN a number that is added to itself a GIVEN number of times, and are we REQUIRED TO FIND the total? In so we multiply the two given numbers.

89 WP Multiplic.: 2 steps: 6 packs, 8 boxes/pack, 4 balls/box

Given: 6 packs, 8 boxes/pack, 4 balls/box

Find: How many balls

Are we GIVEN a number that is added to itself a GIVEN number of times? _____

Are we REQUIRED TO FIND the total? _____

90 WP Multiplic.: 'A' is n times as large as B. Given B

A fully-grown crocodile is (on average) 20 times as long as a baby crocodile. If the baby crocodile is 15 cm long, how long is a fully grown crocodile?

Given: Crocodile is 20 times as long as baby, baby is 15 cm long

Find: How long is crocodile?

Are we GIVEN a number that is to be added to itself a GIVEN number of times? _____

Are we REQUIRED TO FIND the total? _____

91 WP Div.: no rem.: 45 pens divided equally over 5 boxes

We have 45 pens. If we divide them equally over 5 boxes, how many pens will go in each box?

92 WP Div, no Rem: 48 pens, 8 pens/box, how many boxes

We have 56 pens. If we can put 8 pens in each box, how many boxes do we need?

93 WP Div.: add one for rem.: 26 boys, 4 boys/car

26 boys are to go to the football game. A taxi can take 4 boys. How many taxis are needed?

94 WP Div.: ignore remainder: \$26, \$4/book

A student wants to buy story books in a book sale. Each book costs \$4. The student has \$26. How many books can he buy?

95 Div.: 'A' is n times as large as B. Given A

A fully-grown man is (on average) 25 times as heavy as a newly-born baby. If an average man weighs 75 kilograms, how heavy is a newly-born baby?

96 Div.: Given A and B, How many times is A as large as B

A fully-grown man weighs (on average) 75 kilograms. A fully-grown dog weighs (on average) 15 kilograms. How many times is a fully grown average man as heavy as a fully-grown dog?

97 Table, 3 columns: Listing 2 properties of objects

This table gives the size of some aircraft:

<u>Aircraft</u>	<u>Wingspan</u>	<u>Length</u>
DC-9	28 m	36 m
747	60 m	71 m
727	33 m	47

1. Which plane is the longest? _____
2. How much is the wingspan of the 727 more than that of the DC9? _____
3. Which plane has the shortest wingspan? _____
4. How much is the wingspan of the 727 less than that of the 747? _____

98 WP: Make a table of multiples: 3 games = 5 min, 12 games = ?

It takes 5 minutes to play 32 games. How long does it take to play 18 games? Make a table of multiples to help you:

Minutes: 5, 10, _____, _____, _____, _____, _____, _____, _____

Games: 3, 6, _____, _____, _____, _____, _____, _____, _____

99 Time: Hour, half hour, quarter hour

Draw a watch which reads 'ten o'clock'

Draw a watch which reads 'half past three'

Draw a watch which reads 'quarter pst twelve'

100 Time: minutes (e.g. 7:33)

Draw a watch which reads '5:25'

Draw a watch which reads '4:05'

Draw a watch which reads '7:33'

101 Time: Hours & minutes, before and after

What time?

a) 4 hours before 2:00 p.m.? _____

b) 30 min before 2:00 p.m.? _____

c) 5 hours after 10:54 a.m.? _____

d) 25 minutes after 8:50 a.m.? _____

102 Time: a.m. and p.m.

a.m. or p.m.?

Mark had breakfast at 7:00 : _____

John had dinner at 6:30: _____

103 Time: 60 sec = 1 min

How many seconds are in 3 minutes? _____

104 Time: 60 min = 1 hr

How many hours are 120 minutes? _____

105 Time: 24 hours = 1 day

How many hours are in 2 days? _____

106 Time: 7 days = 1 week

How many weeks are 21 days? _____

107 Time: tell time: 6:05, use of 'past' & 'to'

Match

6:05	20 minutes to 3
3:20	quarter past 10
10:15	5 minutes to 6
2:40	quarter to 10
5:55	5 minutes past 6
9:45	20 minutes past 3

108 Measure a line to the nearest centimetre

Measure the length of this line to the nearest centimetre:

109 Distance: Know that 1 m = 100 cm

How many cm are in 1 m? _____

110 Distance: Know that 1 km = 1000 m

How many m are in 2 km? _____

111 Distance: Estimating distance in m and km

The distance from school to the beach is 7 (m, km)

The height of that tree is 10 (m, km)

Estimate the height of your room. _____

112 Shapes: Square, rectangle, circle, triangle

Draw the following shapes: Square, rectangle, circle, triangle.

113 Perimeter of a rectangle, triangle, etc

Perimeter means distance around. Find the perimeter of the figure:

114 Area: Find, in square cm, of given figure

Find the area of the shape below in square centimetres

115 Volume: Find, in cubic cm, of given figure

Find the volume of the shape below in cubic centimetres

116 Volume: estimating volume of cup in mL

Measure a volume of 1L

$$1\text{L} = 1000\text{ mL}$$

Estimate (or find) the volume in mL:

1. A glass of water
2. A large bottle of water

117 Weight: Estimating weight of objects

Find your weight in kg. Find the weight of 1L of water in kg.

$$1 \text{ kg} = 1000 \text{ g}$$

Estimate the weight of a bag of potatoes:

$$50 \text{ g} \quad 50 \text{ kg}$$

118 Temperature: Estimate temperatures

Measure the temperature of the room in $^{\circ}\text{C}$ _____

Measure your own temperature in $^{\circ}\text{C}$ _____

Measure the temperature of ice and water in $^{\circ}\text{C}$ _____

Measure the temperature of boiling water in $^{\circ}\text{C}$ _____

119 Multiplic.: 1-d by mult-of-10, 100, 1000

Complete the following:

$$6 \times 20 = \underline{\hspace{2cm}}$$

$$5 \times 300 = \underline{\hspace{2cm}}$$

$$7 \times 4000 = \underline{\hspace{2cm}}$$

120 Multiplic.: 3 numbers

Complete the following:

$$6 \times 3 \times 10 = \underline{\hspace{2cm}}$$

$$4 \times 5 \times 3 = \underline{\hspace{2cm}}$$

$$7 \times 4 \times 1000 = \underline{\hspace{2cm}}$$

121 Multiplic. 2-d x 1-d: $36 \times 4 = (30 \times 4) + (6 \times 4)$

Complete the following:

$$36 \times 4 = (30 \times 4) + (6 \times 4) = 120 + 24 = \underline{\hspace{2cm}}$$

$$42 \times 4 = (40 \times 4) + (\underline{\hspace{1cm}} \times 4) = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$53 \times 6 = (\underline{\hspace{1cm}} \times 6) + (\underline{\hspace{1cm}} \times 6) = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$46 \times 2 = (\underline{\hspace{1cm}} \times \underline{\hspace{1cm}}) + (\underline{\hspace{1cm}} \times \underline{\hspace{1cm}}) = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

122 Multiplic. 2-d x 1-d, trading ones

Complete the following:

$$\begin{array}{r} 17 \\ \times 3 \\ \hline \end{array}$$

$$\begin{array}{r} 18 \\ \times 4 \\ \hline \end{array}$$

$$\begin{array}{r} 14 \\ \times 7 \\ \hline \end{array}$$

123 Multiplic. 2-d x 1-d, trading ones and tens

Complete the following:

$$\begin{array}{r} 75 \\ \times 5 \\ \hline \end{array}$$

$$\begin{array}{r} 28 \\ \times 4 \\ \hline \end{array}$$

$$\begin{array}{r} 31 \\ \times 7 \\ \hline \end{array}$$

124 Multiplic. 3-d x 1-d, 2 or more trades

Complete the following:

$$\begin{array}{r} 575 \\ \times 5 \\ \hline \end{array}$$

$$\begin{array}{r} 428 \\ \times 4 \\ \hline \end{array}$$

$$\begin{array}{r} 316 \\ \times 7 \\ \hline \end{array}$$

125 Estim.: 1x3d: Round to nearest 10 then MULTIPLY

Estimate to the nearest 10 then multiply:

$$3 \times 754 = \underline{\hspace{2cm}}$$

$$175 \times 4 = \underline{\hspace{2cm}}$$

126 Estim.: 1x4d: Round to nearest 100 then MULTIPLY

Estimate to the nearest 100 then multiply:

$$372 \times 5 = \underline{\hspace{2cm}}$$

$$3713 \times 6 = \underline{\hspace{2cm}}$$

127 Estim.: Round to nearest dollar then MULTIPLY

Estimate to the nearest dollar then multiply:

$$\$3.75 \times 8 = \underline{\hspace{2cm}}$$

$$\$74.50 \times 2 = \underline{\hspace{2cm}}$$

128 Mult.large number x 1-d, 2 or more trades

Complete the following:

$$\begin{array}{r} 152,575 \\ \times \quad 5 \\ \hline \end{array}$$

$$\begin{array}{r} 93428 \\ \times \quad 4 \\ \hline \end{array}$$

$$\begin{array}{r} 12316 \\ \times \quad 7 \\ \hline \end{array}$$

129 Multip. of money by 1-d numbers

Complete the following:

$$\begin{array}{r} \$15.25 \\ \times \quad 5 \\ \hline \end{array}$$

$$\begin{array}{r} \$0.42 \\ \times \quad 4 \\ \hline \end{array}$$

$$\begin{array}{r} \$12.31 \\ \times \quad 7 \\ \hline \end{array}$$

130 WP mult.& subt/add: Lost 5 x 4, left with 8, how many before?

1. Jack had some cards. He gave 6 friends 5 cards each, and he was left with 9 cards for himself. How many cards did he start with?

2. To pay for the bus for the school trip, each of the twenty student paid Dh 5, but the teacher paid Dh 7. How many Dirhams did they pay?

131 Div. by 1-d: Mental maths: e.g. 60 div. by 3

$$5 \overline{)350}$$

$$9 \overline{)270}$$

$$5 \overline{)400}$$

132 Div. by 1-d: 2-d quotient & remainder

Complete the following, showing quotients and remainders:

$$4 \overline{)123}$$

$$7 \overline{)727}$$

$$8 \overline{)414}$$

133 Div. by 1-d: 3-d quotient and remainder

Complete the following, showing quotients and remainders:

$$2 \overline{)233}$$

$$6 \overline{)4127}$$

$$5 \overline{)5454}$$

134 Div. by 1-d: Zero in the quotient

Complete the following, showing quotients and remainders:

$$5 \overline{)2035}$$

$$6 \overline{)27626}$$

$$9 \overline{)6344}$$

135 Div. by 1-d: with money

Complete the following, showing quotients and remainders:

$$4 \overline{)\$123}$$

$$7 \overline{)\$17.27}$$

$$8 \overline{)\$4.16}$$

136 Finding averages

Find the average of the following numbers: 5, 13, 6, 12

137 Estim.: Round to nearest 10 then DIVIDE by 1-d

Estimate to the nearest 10 then divide:

$$544 \text{ divided by } 6 = \underline{\hspace{2cm}}$$

$$155 - 4 = \underline{\hspace{2cm}}$$

138 Estim.: Round to nearest dollar then DIVIDE by 1-d

Estimate to the nearest dollar then divide:

$$\$3.17 - 8 = \underline{\hspace{2cm}}$$

$$\$72.40 - 2 = \underline{\hspace{2cm}}$$

139 Fractions: Naming EQUAL parts (halves, etc.)

1. A square is divided into two EQUAL parts. What is each part called?

2. Draw a circle. Divide it into 4 equal parts. What is each part called? _____
3. Below is a line divided into three parts. Is each part called a third? Why not?

-----|-----|-----|

What is the big part of the line called? _____

What is each of the smaller parts of the line called? _____

140 Fractions: Show fraction of given set of objects

For each group of 8 stars, circle the fraction written under them.

★ ★ ★ ★
★ ★ ★ ★

one half

★ ★ ★ ★
★ ★ ★ ★

one eighth

★ ★ ★ ★
★ ★ ★ ★

one fourth

★ ★ ★ ★
★ ★ ★ ★

three eighths

141 Fractions: Equivalent fractions name same amount

The line below is made of 24 '-'.

1. How many '-' are one fourth of the line? _____ Colour them red.

2. How many '-' are TWO fourths of the line? _____ Colour them blue.

3. How many '-' are one half of the line? _____ Colour them green.
4. Why are one half and two fourths equivalent? _____

142 Fractions: Recognise equivalent fractions

The above line is made of 24 '-'. Use it to answer the questions below.

Which of these pairs of fractions are equivalent?

1/2 and 2/3

1/3 and 2/6

1/4 and 2/8

4/8 and 1/2

2/4 and 2/6

3/4 and 6/8

143 Fractions: Lowest terms

Reduce to lowest terms:

$\frac{10}{16}$

$\frac{3}{30}$

$\frac{2}{16}$

$\frac{5}{25}$

144 Fractions: Comparing fractions

The above line is made of 24 '-'. Use it to answer the questions below.

Which is larger?

1/2 or 1/3

1/3 or 1/4

1/6 or 1/4

2/8 or 1/4

2/6 or 3/8

3/4 or 8/12

145 Fractions: know that 1/2 of 6 means 6 div.2, etc.

Find the value of the following:

One half of 8 = _____

One third of 12 = _____

One fourth of 20 = _____

One fifth of 30 = _____

146 Fractions: 2/3 of 6 means (6div.3)x2, etc.

Find the value of the following:

One half of 8 = _____

One third of 12 = _____

One fourth of 20 = _____

One fifth of 30 = _____

147 Fractions: mixed numerals:eg 3 2/3.

$$4 \frac{2}{3} \text{ means } 4 + \frac{2}{3}$$

148 Fractions: meaning of numerator & denominator

2 <---- this number is called the _____
--

3 <---- this number is called the _____

149 Fractions: Write improper fraction as mixed number

Write as a whole number or mixed number:

$$\frac{24}{3} = \underline{\hspace{2cm}}$$

$$\frac{24}{7} = \underline{\hspace{2cm}}$$

$$\frac{37}{5} = \underline{\hspace{2cm}}$$

$$\frac{56}{8} = \underline{\hspace{2cm}}$$

150 Fractions: Add. & subt. like denominator

$$\frac{3}{8} + \frac{1}{8} =$$

$$\frac{7}{12} - \frac{1}{12} =$$

151 Fractions: Add. & subt. mixed numerals, like denominator

Find the sum or difference:

$$3 \frac{3}{5} + 2 \frac{1}{5} =$$

$$7 \frac{6}{8} - 2 \frac{3}{8} =$$

152 Fractions: Add. & subt. unlike denominator

$$\frac{3}{4} + \frac{1}{8} =$$

$$\frac{7}{10} - \frac{1}{2} =$$

153 Shapes: cone, cube, cylinder, sphere

Draw the following shapes: cone, cube, cylinder, sphere

154 Multiplic.: Mult-of-10 by mult-of-10

Complete the following (mental maths):

$60 \times 20 = \underline{\hspace{2cm}}$

$50 \times 60 = \underline{\hspace{2cm}}$

$70 \times 80 = \underline{\hspace{2cm}}$

155 Multiplic. 2-d x 2-d

Complete the following:

$$\begin{array}{r} 75 \\ \times 25 \\ \hline \end{array}$$

$$\begin{array}{r} 28 \\ \times 14 \\ \hline \end{array}$$

$$\begin{array}{r} 31 \\ \times 67 \\ \hline \end{array}$$

156 Estim.: 2-d x 2-d Round to nearest 10 then MULTIPLY

Estimate to the nearest 10 then divide:

$28 \times 13 = \underline{\hspace{2cm}}$

$19 \times 24 = \underline{\hspace{2cm}}$

157 Estim.: 2d x money: Round to nearest dollar and 10 then MULTIPLY

Estimate the money to the nearest dollar, estimate the number to the nearest 10, then multiply (mental maths):

$$\$3.17 \times 18 = \underline{\hspace{2cm}}$$

$$\$7.40 \times 58 = \underline{\hspace{2cm}}$$

158 Multiplic.: 3-d x 2-d, 2 or more trades

Complete the following:

$$\begin{array}{r} 575 \\ \times 53 \\ \hline \end{array}$$

$$\begin{array}{r} 428 \\ \times 37 \\ \hline \end{array}$$

$$\begin{array}{r} 316 \\ \times 92 \\ \hline \end{array}$$

159 Multiplic.: Money by 2-d numbers

Complete the following:

$$\begin{array}{r} \$15.25 \\ \times 65 \\ \hline \end{array}$$

$$\begin{array}{r} \$0.42 \\ \times 14 \\ \hline \end{array}$$

$$\begin{array}{r} \$12.31 \\ \times 72 \\ \hline \end{array}$$

160 Div.: 3-d Mult-of-10 by 2-d mult-of-10

Complete the following (mental maths):

$$60 - 20 = \underline{\hspace{2cm}}$$

$$480 - 60 = \underline{\hspace{2cm}}$$

$$270 - 90 = \underline{\hspace{2cm}}$$

161 Div.: 3-d No. by 2-d multiple of 10

Complete the following:

$$346 - 20 = \underline{\hspace{2cm}}$$

$$485 - 60 = \underline{\hspace{2cm}}$$

$$279 - 90 = \underline{\hspace{2cm}}$$

162 Div. by 2-d: 1-d quotient and remainder

Complete the following, showing quotients and remainders:

$$53 \overline{)92}$$

$$40 \overline{)399}$$

$$99 \overline{)414}$$

163 Div. by 2-d: 2-d quotient & remainder

Complete the following, showing quotients and remainders:

$$24 \overline{)523}$$

$$12 \overline{)727}$$

$$81 \overline{)4114}$$

164 Decimals: Tenths: Fractions of 10 (e.g. 0.6)

The above line is made of 10 '-'. Use it to answer the questions below.

Color $\frac{3}{10}$ of the line red. This part of the line is also written as 0.3

$\frac{2}{10}$ is the same as 0.____

$\frac{5}{10}$ is the same as ____

$\frac{7}{10}$ is the same as ____

____ is the same as 0.6

____ is the same as 0.8

165 Decimals: Whole numbers & tenths (e.g. 3.6)

Each of the above two lines is made of 10 '-'. Use them to answer the questions below.

Color ONE and $\frac{3}{10}$ of the lines red. This part of the lines is also written as $1 + 0.3$, or as 1.3

$\frac{2}{10}$ means 0.

$3 \frac{2}{10}$ means $3 + \frac{2}{10} =$

0.4 means: _____

6.4 means:

166 Decimals: Hundredths: Fractions of 100 (e.g. 0.26)

Imagine a line is made of 10 '- '.

Colour $\frac{34}{100}$ of the line red. This part of the line is also written as 0.34

$\frac{12}{100}$ is the same as 0.____

$\frac{57}{100}$ is the same as ____

$\frac{71}{100}$ is the same as ____

____ is the same as 0.63

____ is the same as 0.87

167 Decimals: Whole numbers & hundredths (e.g. 3.46)

$\frac{26}{100}$ means 0.____

$3\frac{62}{100}$ means $3 + \frac{62}{100} =$

0.4 means: _____

6.4 means: _____

168 Comparing decimals using =, < and >

Write < (less than), > (more than) or =, in each []

Dear Ralph and Lelia:

Just a transmittal note at this time. I want to
get this material off to you immediately. Hope it will
be helpful.

Best of luck in your latest endeavor. Please keep
in touch.

Sincerely,

George

The Yemeni Program
at
Choueifat National College
Lebanon

I BACKGROUND

I arrived at the American Embassy in Beirut, Lebanon in January 1959 to begin my assignment there as Deputy Regional Training Officer. The major function of the Regional Training Office there was administration and management of the U.S. State Department contract with the American University of Beirut. This contract provided six hundred sixty-five scholarships for students from seventeen nations in the Middle East, North and East Africa and central Asia.

II THE PROGRAM

Dr. Cromwell Riches, the Chief Regional Training Officer, departed for 90 days home leave early in June 1959 leaving me in charge of the program. A week later the AID Representative from Taiz, Yemen came into my office with a problem. He wanted to know how he could manage to have a number of Yemeni youths enrolled for degree study at AUB. I told him that his basic problem was easy to solve but would take time and patience: arrange to place the Yemeni students in a good secondary school in Lebanon and allow them time to complete a good pre-college education. The AID Representative then asked me to find the school best equipped to work with Yemeni students.

I consulted with the Dean of AUB and other Lebanese educators and then visited the National College (prep.-school for AUB) and four recommended outlying institutions. They were all good schools but only one indicated the flexibility needed to prepare special programs for a group of Yemeni students. That school was Choueifat National College, where Mr. Ralph Bistany served as principal and director of programs.

About one hundred Yemeni students had already been moved to Cairo where they were enrolled in elemental programs. I secured appropriate testing materials and with the assistance of Mr. Nabil Haddad, a Choueifat instructor, went to Cairo to test and screen the group. That trip resulted in the selection of the first Yemenis to be enrolled at Choueifat.

An educator could begin to comprehend the problems to be involved only if he had actually visited this most underdeveloped of all Arab countries. I found there an almost complete lack of the many intellectual linkages an individual must have to cope in the modern world. Mr. Bistany understood this and was able to provide the tools for non-pressured educational growth for this group of bright young men.

The Choueifat program was an unqualified success, and though more than twenty years have passed since I initiated it, I still recall the name of student Lutvie Hajira who qualified for admission to AUB pre-engineering after less than two years at Choueifat. I would estimate that four years for those Yemeni students to successfully complete college preparatory work would have constituted an excellent record.

Before leaving for my next post (Afghanistan) I learned that news of the Yemeni program had spread to other Arabian Peninsula areas and that influential Arabic fathers were arranging to send their sons to Choueifat National College.

Also before leaving Beirut I attended one of Choueifat's beautiful outdoor graduation exercises. I could not be other than impressed to note the many ranking Lebanese officials there, which indicated the high regard in which this institution was held.

I retired more than sixteen years ago and, naturally, have no access to US State Department files on Choueifat or AUB, nor would I request any. To the best of my knowledge all information given above would be unclassified.

Telephone call from Miss Miles - 3/19/86 - 11:16 a m

Please call her.

1. Acceptances are coming in from bigger universities. An acceptance from Lehigh.
2. Today, again from Lehigh, one boy last year has been on the Dean's List. They wrote especially to say how pleased they were with him.
3. Ranya Tabari has been nominated to make the graduation speech for her year at Georgetown University Foreign Services Department. She is one of ten nominees. Choice will be made within 4-5 days. If chosen, she will be first Arab, first Palestinian, and first Choueifat graduate.

Abu Dhabi, 31st August 1985.

Dear Sir,

With reference to our earlier discussions regarding the quality of secondary schools in general and the International School of Choueifat in Abu Dhabi in particular, I would like to explain my opinion as follows.

My daughter has been one of your pupils from september 1981 till april 1983. Before we made a decision to which school we were going to send her, we asked information from several people and we decided to try yours.

The first couple of months it was very difficult for her, mainly because of lack of English.

After a while she got used to the language and to the school-system and she started enjoying it.

Before she joined Choueifat she went to the primary school in Holland which gives never homework and you attend lessons only for 28 hours a week. So you can imagine that the increase in working hours was very hard for her.

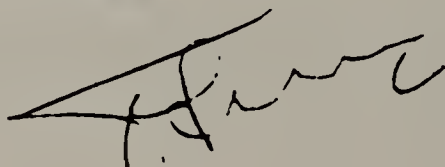

The time she spent at your school was very tough and she had to work real hard, but she always enjoyed it. And not to forget, she learned a lot.

In April 1983 we went back to Holland and she started on the secondary school there. It does not make much difference which one you choose, because you will not find one like Choueifat. The democracy from the pupils is very advanced. The teachers are superior in name in the classroom, but children do as they like. Because it is very difficult as schoolmanagement to remove children from your school (they will end up in court) teachers get so frustated that there is a very high sick percentage. During a couple of weeks I checked the not given lessonhours from my daughter: an average of 1 hour every day, for many different reasons.

Having experienced the difference between Choueifat and schools in Holland, we are very happy to be back in Abu Dhabi, so she can join your school again, because all of us believe in your system.

Keep up the good work.

Yours

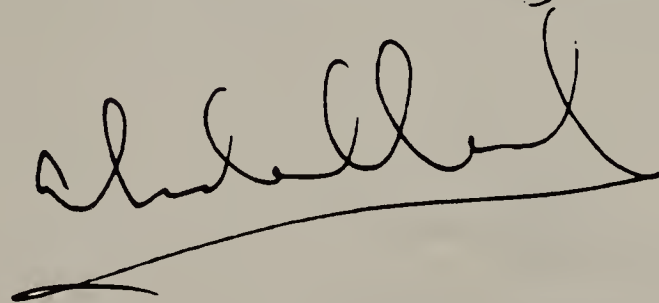

Dear Mr. Germanos,

As a result of your guidance and of those who had taught my Son 'George' during his scholastic years at the 'International School of Choueifat', I received the enclosed letter from the head of the mechanical engineering department at the 'Worcester polytechnic institute' which is self-explanatory.

Thanking you again and looking forward to seeing you soon,

Best regards,

Mr. Germanos
International School of Choueifat
P.O. Box 7212
ABU DHABI - U.A.E.

Dear Mr. Germanos,

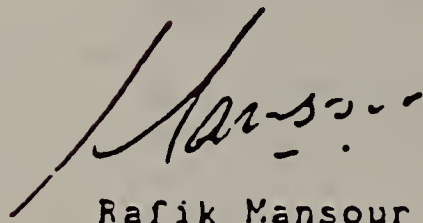

I should like to take this opportunity to inform you that my son, Nicholas Mansour of Grade VI, having taken the entrance examinations for three top schools in London, was able to pass all of them, one with distinction.

Naturally, we are very proud of him, but we feel that a great deal of credit should be accorded to the International School of Choueifat, for the high standard of teaching that my son has received during his time with your establishment.

May I say, on behalf of myself and my wife, that we greatly appreciate the efforts made by all your staff.

With thanks, I remain,

Yours sincerely,

Rafik Mansour

0077/1

I was a student at the International School of ChouEIFat, in Sharjah U.A.E, from 1978 to 1982 and graduated with a High School Diploma and went on to Sophia University in Tokyo.

My main objective in going to university in Japan rather than the U.K., Canada or U.S.A. was that I wanted to learn the Japanese language, Japanese culture, and Japanese business practices. This I thought would be of great help to me later on as I envisaged the emphasis of world trade, economics, as well as financial, might slowly switch from North America to Asia in the 1990's.

The international student body at the International School of ChouEIFat made it easier and quicker for me to accept and adapt to the different culture I found myself in. The high level of English required to graduate from the International School of ChouEIFat ensured that I had no problems with understanding the courses at Sophia. In fact, I found that my English was a distinct advantage over other foreign, as well as Japanese, students who at times struggled with the language. The high level of self discipline needed to succeed academically at the International School of ChouEIFat also helped once you entered university, and were as such, left on your own to set targets and accomplish them.

April 14, 1992

Mrs. Nadia Reda
Headmistress
International School of Minnesota
Eden Prairie, MN 55344

Dear Nadia,

I can hardly believe that we are already nearing the end of the 1991-92 school year. With all good intentions, I have somehow managed to let the year slip by without keeping in touch. It has been an especially busy year for all of us. Since we were in the Twin Cities last year so unexpectedly, there were many things here in Dhahran that we had left undone and unattended - we have paid the price this year, trying to get back on track. I am beginning to feel now that we are caught up (just in time to go away again for the summer!).

I had meant to keep in touch with all of you at ISM, since you were so important in our lives last year, and filled such a void with a school that was at once familiar and excellent. Both Dina and Sami had such a good experience with you. We often talk of what it was like for them to be in school in the States. Their teachers and friends were all wonderful. Sami sends regards to Mrs. Herbranson, to Ms. Hugo, to all his other teachers and friends. Of course you have all recently seen Dina, who told me she visited when she was in MSP over spring break. She is really happy at Wellesley, has registered for her first two M.I.T. courses this semester (it seems most of the architecture courses are at M.I.T.), and has nothing but warm memories of being at ISM and one of it's first graduates. She plans to come to Dhahran in mid-May, when finals are over, then we all hope to be in the Twin Cities in July and August. We'll plan to see you then.

To the Class of 1992 - best wishes - may your futures be bright. I'm wondering where they will choose to be next year... can't wait for all the news. I really wish we could be there for the second graduation ceremony! We'll be with you in spirit.

Hello to all.

Linda Amin

January 24, 1990

Dr. Dale Koch
6385 Beach Road
Eden Prairie, Minn.
55344

Dear Dr. Koch,

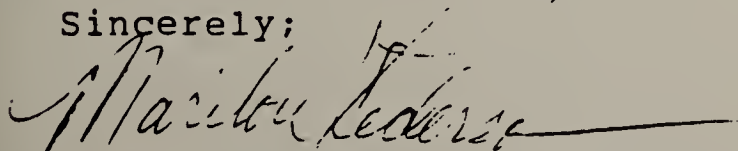

→ The International School of Minnesota and its staff have exceeded my expectations in educating my children. I am extremely pleased with the academic curriculum and the close monitoring of each child's progress and areas of strengths and weaknesses. The follow through on results of observation and testing has been thorough. All of the teachers and staff that Kori and Kelsey have been in contact with have been sensitive, challenging and cooperative. The transition from Montessori to The International School for both of my girls was difficult and yet a positive experience because of the caring nature of the school. I appreciate the consistency of concern and sensitivity to the needs of my children.

I have been most impressed with Sue Hugo and her ability to recognize and meet the individual needs of students. Kori has had an especially positive and growth producing relationship with Miss Hugo. We look forward to continuing this relationship next year in fifth grade in the consistent on-going math program with math instruction by Miss Hugo. We also appreciate the consistency in English and Spanish.

→ As a Pediatric Practitioner in Edina, I come in contact with 20-30 families daily and am frequently asked for educational recommendations. I am most pleased to tell them that I entrust my children's education to I.S.M. because of the small class sizes, the academic accountability, the caring nature of the school, the second language, and the great staff.

Our family looks forward to an ongoing educational partnership with The International School of Minnesota. Thank You.

Sincerely;

Marilou Pederson

Another letter of
paise & recommendation
Dolan

FEB. 20 1990

Dear Dr. Keen,

Following our week-long visit to Vancouver, Louisa began to have some doubts about remaining behind in Minneapolis on her own for three months. Although the desire to stay on at school & complete the year is extremely strong, the emotional needs & concerns have surfaced, making the decision more complicated.

For the last few weeks she has been vacillating between 'staying' & 'going' and has given both possibilities a lot of thought. However, she has now concluded that although her mind tells her to stay her heart feels she should go with us. Consequently Louisa's last day at school will be March 8 since we depart for Vancouver on March 9.

A few chosen words cannot really express the pleasure & pride we have felt that Louisa was able to attend the I.M.S. this year. It has proven to be a most beneficial year for Louisa, both academically & socially. You have

a wonderfully dedicated & enthusiastic staff & each one of them has, in his or her own way had a significantly positive effect on Louise's feelings not only about learning but also about herself. The I.M.S. has provided a safe, secure & friendly learning & growing environment. As a parent I thank you for that.

I hope that Louise will still be able to attend the I.M.S. upon our return & I shall look forward to seeing you again then.

Sincerely,

Great Officia

Dear Mrs. Delameter, Miss Hugo, Mrs. Valtsvik &
Mrs. Barientos:

As you celebrate your 100th day with the International School of Minnesota, I wanted to take this opportunity to share a very special "THANK YOU" for such a wonderful addition to Kristina's life. As an educator myself, I notice and very much appreciate all of the little "extra things" each and everyone of you has given to Kristina on a daily basis. I also understand that you are able to do so not only with just her, but with each of the youngsters with which you work! Such an outstanding commitment and follow-through deserves special recognition.

As you have probably noticed, I expect the best- I think our American youngsters face challenges in their future that only the most dedicated educators in their daily learning experiences will be able to help them prepare for. The competition they will face, and the problems our bright young Americans WILL HAVE TO try to solve in cooperation with their other "friends from abroad" can only hope to be successfully tackled with the skills; affective, as well as mental, which you are now little-by-little, instilling in your "charges". From what I have seen not only in the skills and attitudes Kristina has demonstrated, but also in the various programs, fieldtrips, and verbal/written communications my husband and I have had with you four, there is no doubt in our minds, that you "are doing your job" most excellently. You ACCEPT and try to synergize comments, constructive criticism in a positive way. Most importantly, none of you has ever become defensive regarding comments or suggestions. You thereby have left open channels with which you may

continue to improve. -- just one more evidence of your ability to accept the opinions and/or expertise of others. Such an openness and flexibility on the part of educators is noteworthy and most commendable! Not all teachers in our field have the strength of character nor strong background to allow such open parent-teacher communication.

I cannot speak highly enough of you four, and since this week "marks a celebration of sort", my husband and I simply wanted to share our feelings with you. Please continue the good work, and if we as parents can help in any way to facilitate your good work, please do not hesitate to contact us.

Most sincerely,

Julie Archer-Rath

February 28, 1986

We first learned of the International School, last August, 1985, from an article in a local newspaper. Several stated objectives caught our attention, which prompted a visit. We were sufficiently impressed by the school's background and those we met, that we decided to enroll our nine year old daughter, Rachel, in the fourth grade.

What were the concepts that seemed so appealing? Certainly, one was that education must be viewed as educating the whole child. The program must be academically sound, and the child should be comfortable in the learning environment. The student should be taught to recognize their feelings, express them, and then deal with them positively. With this accomplished, children can progress academically. Right critical thinking is a prime goal of the school. Another is to appreciate and accept those who are different from ourselves, and thus learn more about who we are. This goal is greatly enhanced by the language program at the school and the diverse backgrounds of the student body and faculty.

The philosophy of constantly testing for learned academic skills, has proved beneficial for Rachel. All learning comes in steps, and regular testing gives the child confidence in their academic proficiency, thereby allowing them to proceed to the next and more difficult step. Through constant testing the child and teacher are aware of their progress on a timely basis, which becomes an important motivating factor for the teacher as well as the child.

In many schools, classroom discipline is ineffective and impedes the learning process. A fresh approach to this problem is part of the school's philosophy of removing a disruptive child from the classroom. This accomplishes several things. Valuable learning time is not wasted, and negative feelings toward the teacher are reduced. Also, it allows the disruptive child to express the feelings which are causing the behavior in a private, non-humiliating atmosphere, with a professional that is qualified to help the student.

The end of Rachel's first year at The International School is rapidly approaching. Simply stated, our daughter is "happy" at school, and that is one of the best indicators of all. She has mastered some difficult academic concepts, improved her study habits, and developed a more positive attitude, which allows her to see and feel proud of her achievements. We want these skills to continue to blossom and grow, right along with the International School! The excellent school staff has provided the expertise and encouragement that has nurtured Rachel's growth.

We have three children, ages 5, 10, and 15, and are involved in high school, elementary, and nursery school activities. In May of this year, our 4th child will arrive and add a new dimension to our family. The philosophies of the International School reinforce what we, as parents, are trying to teach as a family: Namely, that learning is fun and we as individuals are part of a life-long process of growth, which includes the acceptance of self and the realization that we live in an International world of diverse peoples.

TUFTS UNIVERSITY

Department of Mathematics

RECOMMENDATION FOR ALI HAMMOUD

While still a high school student, Ali Hammoud took Math 11, our introductory calculus course at Tufts, in summer school in 1984. His performance, in the rather rough version of that course as I taught it, was very impressive. On exams, with a class median ranging from 40 to 79 points, Hammoud's scores ranged from 74 to 99. He showed a quick grasp of the subject, and was a careful, persistent and incisive worker on homework problems. He was highly motivated, asking me often about difficult problems which had not been assigned. Beyond his performance as a student, I found him a polite and very pleasant young man. I would recommend him very highly to any undergraduate institution.

Sincerely,

Zbigniew Nitecki
Professor

Dear Sir:

Every term a list of students who have achieved the special distinction of a 3.0 grade point average is published at Lehigh. It is a list I am particularly interested in since it is known as the Dean's List and it often contains those students who are going to be Lehigh's success stories in the future.

Among this fall term's list in the College of Arts and Science was Dilip Mangalal who recently graduated from the International School of Choueifat. We are now especially proud of him as I am sure you were a few months ago, and I thought it a good time to let you know that he has made a successful start in his undergraduate career.

GEORGETOWN UNIVERSITY

Edmund A. Walsh School of Foreign Service

Office of the Dean

Dear Mr. Tabari:

Because of the excellence of your academic record, I am pleased to inform you that you are among those eligible for selection as the student speaker at the annual Tropaea Exercises to be held on Saturday, May 24, 1986, in Gaston Hall at 7:30 PM.

The Committee on Graduation decided last year that all seniors with a cumulative grade point average of 3.65 or higher as of January, 1986 would be eligible for the honor of selection as Tropaea student speaker. The Committee asks that ballots bearing the names of qualified and interested seniors be submitted to all members of the senior class who will elect the speaker.

I hope you will agree to submit your name for this honor. The student selected will have his or her speech reproduced by this office and distributed after its presentation to the guests.

Please indicate your decision below and return this signed notice to Mrs. Harrison in the Foreign Service Dean's Office no later than Friday, April 4.

Sincerely,

Peter F. Krogh
Dean

COLLEGE OF ENGINEERING
THE UNIVERSITY OF TEXAS AT AUSTIN

Office of the Dean · Austin, Texas 78712-1060

February 6, 1985

Krishan Nainani
W0188 Jester Center
Austin, TX 78784

Dear Mr. Nainani:

It is my pleasure to inform you that because of your good scholastic performance for the FALL 1984 semester, your name has been placed on the Honor Roll of the College of Engineering. This is an outstanding mark of accomplishment and distinction. I know you are justifiably proud of it; so are we.

We are pleased to honor you as an outstanding student in the College of Engineering, and we wish you continued success in your future academic endeavors and/or professional career.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles A. Sorber", with a long horizontal flourish extending to the right.

Charles A. Sorber
Associate Dean for
Academic Affairs

Extracurricular Activities

Term II • Preschool - Grade 5

December 15, 1993

Dear parents and students,

Let it snow, Let it snow, Let it Snow! Oh, the weather outside is not so frightful, and extended day will be delightful. As the holiday season quickly sneaks up on us, so does the beginning of Winter II Term Extracurricular Activities.

Attached you will find descriptions of the extracurricular activities for Winter Term II, January 10 through March 4. Please read these thoroughly. I hope there will be something that appeals to everyone. Be sure to choose carefully; we encourage students to attend all classes for which they register. There are NO REFUNDS given after the first day of classes.

Students who are registered for music lessons will begin their lessons on January 3, as soon as we return to school. If your child is not continuing his/her music lessons, please send a letter to me stating that he/she will not continue by the first day of the regularly scheduled lesson.

Elementary students who do not choose an extracurricular class or activity will check into extended day where students actively choose what they would like to do. Examples of these choices are the playground, study buddies, library, computer room, gym, or the multipurpose room. Students can choose one of these spots, and if that room closes, students check into another room. Movement from one location is allowed, as long as students check out and in.

Early Childhood (preschool and prekindergarten) students will stay with their classroom teachers until 3:45. At 3:45 the students will join with their extended day groups for a variety of activities and games. Kindergarteners join their group at 3:15. Please make sure you check your child out with the teacher s/he is with and in the front office.

Registration must be returned to the office by Wednesday, January 5. I will do my best to accommodate everyone's schedules. Please remember that classes are filled on a first-come, first-serve basis.

Happy Holidays,

Lisa Larson
Extended Day/Extracurricular Coordinator

FOODS

Fun with Foods

Students will create race cars, roller skates, pixie dust wands, and a variety of fun things using a variety of food, candy, and household items. Due to overwhelming demand, this class is open only to those students who did not take Fun with Food in the Fall Term

Laura Harvey		Minimum	7	Maximum	10
Grade K	TH		4 10-5:00	Fee	\$30
Grade 1 - 2	TH		3 15-4:00	Fee	\$30
		Minimum	6	Maximum	8
Grade PS - PK	M		4 10-4:40	Fee	\$23

Gourmet Kids

Here is your chance to be the chef! We will be learning to plan and prepare meals by using a variety of cookbooks. Students must be able to read simple directions and be familiar with measurements. Due to overwhelming demand, this class is open only to those students who did not take Gourmet Kids during Fall Term.

Laura Harvey		Minimum	7	Maximum	10
Grade 3-5	T		3:15-4:30	Fee	\$33

CELEBRATE WITH ANOTHER CULTURE

French Frolics

Come and travel on the roads and towns of France. Learn a new French song every 3 weeks, play some French games, watch French cartoons and practice speaking French. Celebrate holidays such as "Epiphanies" (January 6th), La Chandeleur", and Mardi Gras. Join the fun.

Virginie Allard & Kenza Filali-Ansari		Minimum	7	Maximum	10
Grade 1-5	W		3:15-4:30	Fee	\$20

Spanish Delight

Summer Games for cold noses are just the beginnings. Join in two short plays to learn about some Spanish writers. Typical songs from different Spanish speaking regions (Spain, Mexico, Central America, Uruguay and Argentina) will also be sung. Of course, we'll take time to celebrate several holidays such as Wisemen Day, St. Valentine's Day, and Carnavel. Enjoy a few cartoons with a chocolate snack.

Danni Acosta & Carina Lubatti		Minimum	7	Maximum	10
Grade 1-5	W		3:15-4:30	Fee	\$20

MUSIC CLASSES

Adventures in Music

Children discover the sounds and thrills of music through singing, dramatizations, literature, games, and movement.

Sheryl Ebert
Grade PS-PK

T

Minimum: 6
3:45-4:20

Maximum: 10
Fee: \$30

Exploring Music

Children uncover the many dimensions of music through singing, playing instruments, literature, and movement.

Sheryl Ebert
Grade K-1

TH

Minimum: 6
3:15-4:00

Maximum: 10
Fee: \$30

Discovering Music

Children experience music through the exploration of Orff instruments. They will learn elements of music by playing pitched and unpitched percussion instruments. The Orff approach is designed to accommodate students of all ability levels. The children will end the term by performing a small sampling of their favorite Orff arrangements.

Sheryl Ebert
Grade 2-5

W

Minimum: 6
4:15-5:15

Maximum: 10
Fee: \$33

Music Lessons (grades 1-5)

Students who are currently enrolled will continue with lessons unless we receive notification in writing indicating otherwise. New students, please contact Lisa Larson at 941-3500 if interested in starting music lessons.

Fee: \$12 per lesson

DANCE

Dance

Let it snow! Let it Snow! Let it Snow!

We don't care what the weather is doing outside, we will be keeping wonderfully warm inside dancing ourselves silly to lots of fun music. Last term we concentrated on technique and creative movement. This term we are going to work on performance skills, memorization, and self-confidence, hopefully putting together a short program of dances and story mimes that the children enjoy the most. Please wear comfortable clothes for stretching and movement.

Pat Joy

Grade 1-3 TH
Grade PS- PK TH
Grade K T

Minimum: 4
3:15 - 4:00
4:10 - 5:00
3:15 - 4:00

Maximum: 9
Fee: \$33
Fee: \$33
Fee: \$33

ACADEMIC POWER TIME

Here is a chance to work on your academic project in school with teachers and friends to guide you. Come work together. Don't put it off until the end. Use this POWER TIME to work and get it done. Ask questions, get ideas, share ideas and get additional computer time. Remember, it is fun to work together!

Carolyn Fuller/ Ms Pierce
Grade 4-5 TH

3:15 - 4:30

Fee NO CHARGE

COMPUTER

The Secret Island of Dr. Quandary

An action-adventure game that challenges students' thinking skills, reflexes, and nerves! Dr. Quandary has students trapped on his island and plans to keep them forever. Students must outwit him and solve each crazy puzzle he throws their way. It's an experience that they won't forget!

Whitney Pierce
Grade 4-5 W

Minimum: 4
3:15 - 4:00

Maximum: 8
Fee: \$20

Young Authors

With imagination as their guide, students will write and illustrate their own stories on the computer. The publishing process will include: looking at examples of literature of many cultures, writing, editing, illustrating book covers, as well as sharing their creations with peers and parents

Whitney Pierce
Grade 2 T

Minimum: 4
3:15 - 4:00

Maximum: 8
Fee: \$20

CHESS

Chess Junior

Chess junior is offered for those who do not know how to play chess or are unsure of some of the rules. Students will learn the game in its entirety, while having fun at a pace that is comfortable for each student.

Todd Wright
Grade 1-5 T

Minimum: 6
3:15 - 4:00

Maximum: 10
Fee: \$22

Chess Club

Chess Club is offered for students who already know how to play chess but would like to improve their game and have more practice. Strategies and game plans will be incorporated to make the student a more confident and versatile player.

Todd Wright
Grade 2 - 5 TH

Minimum: 6
3:15 - 4:00

Maximum: 10
Fee: \$22

Craft Connection

Winter Blahs - no such thing!

Let's sculpt a "Frosty the Snowman," make thumbprint caricatures and a Valentine project; try our hand at paper-making; and a few other surprises.

ARTS, CRAFTS AND FIRST AID

Nancy Gagner	Minimum: 7	Maximum: 10	
Grade 2-5	W	3:15 - 4:00	Fee: \$35
Grade PS-2	W	4:10 - 5:00	Fee: \$35

Exploring Art

We just don't stop exploring! Everyone's doing it! A class for young artists who will be excited about their own ideas and creations. We use a variety of materials and methods to look for and create amazing things.

Beth Bogle		Minimum: 8	Maximum: 10
Grade 2-5	M	3:15-4:00	Fee: \$36
Grade PS-2	M	4:10-5:00	Fee: \$36

Family Winter Story Book

There must be great stories for a cold winter, and what better way than to include your family? Students will bring photos of themselves and members of their families (pets, too, of course) and put them together with original art in their very own winter story art books. Great for a long, after-school, winter's nap!

Beth Bogle		Minimum: 8	Maximum: 10
Grade 2-5	F	3:15-4:00	Fee: \$45
Grade PS-3	F	4:10-5:00	Fee: \$45

First Aid for Kids

How can you help if your friend gets cut on the playground? Do you know how to answer your phone? What do you do if a stranger comes to the door?

Through skits, games, and projects, children will learn basic, common-sense methods for keeping safe at home, in school, and at play. This is a five week class beginning January 24.

Lisa Larson		Minimum: 8	Maximum: 10
Grade K-1	M	3:15-4:00	Fee: \$15

CONTINUING CLASSES

Daisy Girl Scouts & Brownie Girl Scouts

"Be prepared" is the motto of a true scout! The goal of these programs is to encourage self-confidence while having fun earning Try-Its. The girls will be exploring the sciences, outdoors, and the arts. Be prepared for adventure and fun!

Daisy Girl Scouts For Kindergarten

Leaders: Lori Flemmer, Tresca Elwell, Kim Chaney, Cindy Pugh & Laura Harvey

Gr K F 4:00 - 5:00

Brownie Girl Scouts Grade 1

Leaders: Joan Engstrom, Ann Johnson, Teri Popp, Audrey Thayer & Valerie Watson.

Gr 1 TH 4:00 - 5:30

Meets the first and third Thursday of every month.

Brownie Girl Scouts Grade 2

Leaders: Barbara Betersdorf, Pat Duarte, Teri Popp, & Loria Danage-Scott

Gr 2 F 4:00 - 5:30

Will meet every other Friday

Boy Scouts

The purpose of scouting is to develop character, responsibility, leadership, and service. The International School scout program is a year-round program with fewer meetings during the summer. Typically, scout dens are led by parents. Currently, we have a small group of parents contributing time and leadership. If you would like to help, please contact Lisa Larson at 941-3500.

Cub Scouts Grade 2

Robert Elwell & Alice Markham

Gr. 2 T 4:15 - 5:30

Tiger Scouts Grade 1

Robert Elwell & Alice Markham

Gr. 1 T 4:30 - 5:30

Meets every other Tuesday.

Campfire

Come join in the fun of learning a new skill, doing a craft, helping the community, and learning about ourselves and our neighbors.

Colleen McLain

Gr 3 TH 3:15 - 4:00

Swimteam

Students grade 3 through 5 will continue to practice on their strokes and build up their endurance. Students will participate in swim meets during this term. There is no space for new students.

SPORTS

Karate

Learn basic self-defense! Karate is taught by instructors from the National Karate School. Emphasis is placed on stretching and warm-up exercises, blocking, and evasive movement. Beginners work towards the white belt. Classes at the gold and green belt levels are also available. Karate is offered only for 1st-5th grade students. Karate meets twice a week.

National Karate School		Minimum: 6	Maximum: 10
Green Belt	T and	4:10 - 4:55	
	F	3:15 - 4:00	
Gold Belt	T and	3:15 - 4:00	
	F	4:10 - 4:55	

Fee: \$85 Uniforms and testing for belts are additional costs.

*White Belt	M and	3:15 - 4:00
*(more than 10 weeks of lessons)W		3:15 - 4:00

Beginners	M and	4:10 - 4:55
	W	4:10 - 4:55

Fee: \$75 Uniforms and testing for belts are additional costs.

Gym-Mobile

Run, jump, tumble, and roll! The emphasis of this program is on fine and gross motor skills development. This class is designed to give children fundamental physical movements and elementary gymnastic skills.

Minnesota Gymnastics Incorporated		Minimum 7	Maximum 10
Grade K-1	F	3:15 - 4:00	Fee \$54
Grade PS - PK	F	4:10 - 4:55	Fee \$54

Tumblers

The emphasis in this program will be on tumbling skills, such as forward and backward rolls, back extension rolls, cartwheels, round-offs, handstands, handstand forward rolls, front and back walk-overs, etc. The program will also introduce spring board activities. The program is designed for the beginner as well as the advanced student. Each child will be challenged at his/her ability level.

Minnesota Gymnastics Incorporated		Minimum: 6	Maximum 15
Grade 2-5	F	3:15 - 4:00	Fee \$54
Grade 1-5	F	4:10 - 4:55	Fee \$54

Basketball

Come join the group and shoot some hoops! Basketball will be offered for 4th and 5th grade. If we have more than 8 students, we will try to schedule some games. If we have less than 8 students, we will continue to learn and develop skills to enhance the game. Practice dribbling, shooting, and passing. Give it a try. The fee does not include the cost of any games.

Todd Wright		Minimum: 5	Maximum 15
Grade 3-5	M & W	3:15 - 4:00	Fee \$45
